BY THE SENATE,

JANUARY 28TH, 1874.

Read and 50 copies for each member ordered to be printed.

By order,

AUGUSTUS GASSAWAY,

Secretary.

ANNUAL REPORT

OF THE

STATE BOARD OF EDUCATION,

SHEWING THE CONDITION OF THE

PUBLIC SCHOOLS

OF MARYLAND,

WITH THE

REPORTS OF THE SCHOOL COMMISSIONERS,

OF

Baltimore City and the Several Counties,

FOR YEAR ENDING SEPT. 30, 1873.

ANNAPOLIS:

STATE OF MARYLAND,

DEPARTMENT OF PUBLIC EDUCATION,

Office of the State Board of Education,

BALTIMORE, January 15th, 1874.

TO HIS EXCELLENCY,

W. PINKNEY WHYTE,

Governor of Maryland:

SIR:

I have the honor to transmit to you the Annual Report of the State Board of Education, with the accompanying documents, for the year ending September 30th, 1873.

Very respectfully,

Your obd't servant,

M. A. NEWELL, *President.*

REPORT.

The following summary exhibits, in a condensed form, the most important facts connected with the administration of the Public School System of the State, including the city of Baltimore, for the year ending Sep. 30th, 1873:

Number of schools in Baltimore city	123	
" " " the counties	1,619	1,742
" different pupils—city	40,183	
" " " —counties	90,141	130,324
Highest number enrolled in one term—city	28,329	
" " " " " —counties	70,929	99,258
Average number in daily attendance—city	22,181	
" " " " —counties	38,636	60,817
Number of Teachers—city	624	
" " —counties	1,931	2,555
Number of months schools were open—city	10	
" " " " " —counties	$9\frac{1}{5}$	

Average for the State, $9\frac{13}{30}$ months.

Amount paid for teachers' salaries—city	$388,984 77
" " " " —counties	500,491 70
Amount paid for building, repairing and furnishing School-houses—city	83,133 46
" " building, repairing and furnishing School-houses—counties	114,253 64
Amount paid for books and stationery—city	25,484 13
" " " " —counties	44,042 16
Amount paid for colored schools—city	38,166 48
" " " " —counties	31,410 70
Total expenditure for Public School purposes—city	540,487 67
" " " " " —counties	813,579 04
Total expenditure for the State	1,354,066 71

Excluding the schools in Baltimore city, and comparing the County Schools of the present with those of the preceding year, we have the following exhibit:

Average number of schools reported in 1872	1,398
" " " " 1873	1,619
Increase in 1873	221
Total number of scholars enrolled in 1872	77,943
" " " " 1873	90,141
Increase in 1873	12,198
Highest number enrolled in one term, 1872	62,228
" " " " " 1873	70,929
Increase in 1873	8,701
Average number enrolled in 1872	56,237
" " " 1873	63,879
Increase in 1873	7,642
Average number of scholars in daily attendance, 1872	34,909
" " " " " 1873	38,636
Increase in 1873	3,727

	1872	1873
Number of different teachers (including assistants) men	955	1,006
" " " " " women	764	874
" " " " " Sex not reported		51
Total	1,719	1,931
Increase in 1873		212

Average number of months schools were open, 1872	$8\frac{3}{4}$
" " " " " " 1873	$9\frac{1}{5}$
Increase in 1873, $\frac{9}{20}$ of a month.	

Amount received from the State as School Tax: Free School fund, and Academic fund, 1872	$342,736 56
" " " " " 1873	331,837 04
Decrease in 1873	10,899 61
Amount received from County taxation in 1872	308,968 69
" " " " 1873	335,371 43
Increase in 1873	26,402 74
Amount paid for Teachers' salaries in 1872	485,857 81
" " " " 1873	500,491 70
Increase in 1873	14,633 89

Amount paid for building, repairing and furnishing School-houses in 1872	43,816 81
" " building, repairing and furnishing School-houses in 1873	114,252 64
Increase in 1873	70,435 83
Amount paid for books and stationery in 1872	56,901 53
" " " " 1873	44,042 16
Decrease in 1873	12,859 37
Amount paid for supervision and office expenses, 1872	39,631 06
" " " " " 1873	38,923 78
Decrease in 1873	707 28
Amount paid for incidental expenses of Schools, 1872	37,007 69
" " " " " 1873	43 348 63
Increase in 1873	6 340 94
Amount paid for interest in 1872	7,064 42
" " " 1873	5,127 27
Decrease in 1873	1,937 15
Amount paid for miscellaneous expenses, 1872	9,707 67
" " " " 1873	3,101 58
Decrease in 1873	6,606 09
Amount paid for colored schools in 1872	6 832 81
" " " " 1873	31 410 70
Increase in 1873	24,577 89
Amount of indedtedness paid in 1872	29,676 16
" " " 1873	32,879 58
Increase in 1873	3,203 42
The items of expenditure which show a decrease, are Books and Stationery, Supervision and Office Expenses, Interest and Miscellaneous—total decrease	22,109 89
The items of expenditure showing an increase, are Teachers' Salaries, Building, repairing and furnishing school-houses, Incidental Expenses, Colored Schools and Indebtedness paid—total increase	119,192 97
Showing a net increase in the running expenses of	97,083 08
Total expenditure for Public School purposes in 1872	716,495 96
" " " " " 1873	813,579 04
Increase in 1873	97,083 08

In the last annual report it was said at the conclusion of the statistical summary: "We have shortened the average school year by about ten days; we have diminished the teachers' salaries by about $24,000; we have spent $31,000 less on building, repairing and furnishing school-houses, and, in return, we find 2,286 fewer children on the rolls and 2,040 fewer in average daily attendance."

It is very gratifying to see that this year the shades of the picture are reversed. We have lengthened the School year, as compared with the last, by sixteen days; we have increased the teachers' salaries by $14,000; we have spent $7,000 more than last year on building and furnishing school-houses; and, in return, we find that the enrolment of pupils is increased by 12,198 names, and the average daily attendance by 3,727. The total expenditure for schools exceeds the expenditure of last year by $97,083.08, but there has been a decrease in the items of "Books and stationery," "Supervision and Office expenses" and "Miscellaneous expenses," amounting to more than $22,000. With the exception of the appropriation for Colored Schools, of which the counties received $40,585.08, this increased expenditure has been provided for by County taxation, voluntarily imposed; for the proceeds of the State School Tax and Free School Fund were less than in the previous year by nearly $11,000.

It is true that the greater part of the increase in the number of pupils is due to the opening of schools for colored children: still there is evidence of progress in the other schools, which show an increased enrolment of 1,009 pupils. A mere comparison of numbers, however, will fail to indicate the actual advancement which has been made. The popular feeling in favor of Public Schools is more unanimous and more intense now than at any previous time. Although a greater number of school-houses have been built than in any former year, the demand for more and better houses is still on the increase. There is more

inquiry for experienced and well-qualified teachers, and a greater willingness to pay them adequate salaries. Several new High Schools have been established, some Academies, on the old foundation have been transformed into Public High Schools, and many graded schools have assumed such proportions, that we may expect them before long to furnish the foundation for additional High Schools. Every effort on the part of School Boards to furnish better accommodations and better teachers has been responded to by the people, and has resulted in an increase of pupils and in a higher appreciation of the School System. We can point to instances where an old school-house was torn down and one twice as large built in its stead, and yet the new house was too small to accommodate the unexpected increase of pupils. It ought to be added that, in the cases referred to, the news chool-houses were complemented by new teachers at higher salaries. If the policy of providing good houses, good furniture, and highly qualified teachers, prevailed all over the State, the increased attendance would surprise even the best friends of Public Education.

It must be borne in mind that the gratifying summary which we have given, is taken from the Public School System as a whole, and the inferences drawn from it cannot fairly be applied to all parts of the State indiscriminately. While we recognize with gratitude the efforts that have been made in many counties to make the schools worthy in every respect of the patronage of the people, we must acknowledge that there are other counties on which no eulogium can be pronounced, and which, so far from swelling the general tide of prosperity, have contributed only to lower the average level.

A reference to the tables that follow, and to the County Reports, will show one or more counties where the school year has been reduced to the minimum permitted by law; where the County School Tax does not even reach the amount which the School Commissioners are authorized to demand, and which the County Commissioners cannot

legally refuse; where teachers' salaries are so low that somebody must inevitably be cheated—the teacher, if he is competent, and the public, if he is not; where the building of school-houses is becoming one of the lost arts; where even necessary repairs are with difficulty obtained, and where, as a matter of course, the attendance is either stationary or diminishing from year to year. For such exceptional results in the midst of general prosperity, the School System is not to be held responsible. The law puts it in the power of the citizens of every county to have a good school in every district; it gives them advice, encouragement and substantial aid, but it does not use compulsion. And, we think, rightly. In order to become a permanent and popular institution, the School System must be the natural outgrowth of the people themselves; it must be adapted to their circumstances; it must give expression to their convictions; it must supply a want which they feel, and in a way which they approve. It cannot drop down among us, unsought for, as a Palladium from Heaven; nor can it issue full-grown and fully armed from the brain of some legislative Jupiter. Unless it grow up at our own firesides, we cannot be sure that it will not one day be driven out as an intruder. A superior power might, for a time, enforce a cold and superficial hospitality; but, while there would be few to welcome the coming, there would probably be many "to speed the parting guest." Therefore, although it must be confessed that some parts of the State are still in comparative darkness, yet, we think it is better to wait patiently for the dawn that is surely though slowly coming, than to resort to artificial light, whose permanence we cannot ensure. In a word, it is impossible to educate those who do not desire education, and if it were possible it would be comparatively useless.

It may be doubted whether the State has done all that might have been done to explain to the people the advantages of Public Schools, and to persuade them (where persuasion was needed) to nourish and cherish them as the

only sure foundation of public prosperity, and the only guarantee of Republican liberty. These are among the most important duties which devolve upon a State Superintendent of Public Instruction, an office which was abolished by the School Law of 1868. The superintendence of the schools has, since that year, been conducted by a Board, of which every member had his time fully occupied by other, though kindred pursuits. No reasonable man can doubt that the School interests of Maryland have, now at least, assumed such proportions as to demand the entire time of one man, aided though he may be, by able assistants and counsellors. It matters little what title such an officer receives, provided that he is endowed with the necessary authority, and is not hampered with other duties.

ATTENDANCE.

The average daily attendance does not show an increase proportionate to the increase in the number of different pupils. This is accounted for partly by the prevalence of sickness to an unusual extent, and partly by necessities of labor; but it is to be feared that there is a large residuum of absenteeism which must be attributed to other causes:—indifference in the parents, lifelessness in the schools, and want of energy in the visiting officers. In reference to this last cause it may be observed that the District Trustees are required by law to visit the schools frequently, but this duty is very seldom performed. The Examiner is required by law to visit every school in his county twice a year, and if there are less than fifty schools in the county, three times. The aggregate number of official visits paid by the Examiners to the schools under their charge is about one thousand short of the number required by law. What effect a thousand additional visits might have produced upon the attendance, we can only conjecture; but it is certain, that without constant, searching, conscientious, and judicious superintendence, the schools cannot flourish. Believing that the

teacher has it in his power to diminish, to a certain extent, the irregularity of which we complain, we repeat the recommendation made in a former report, that a certain portion of his salary should depend upon the average daily attendance. Unless some energetic measures are put in operation, we are afraid that the irregularity will increase, and that teachers will become reconciled to it as one of the evils that "can't be cured and must be endured."

COLORED SCHOOLS.

Colored Schools are reported as having been established in all the counties, as follows: Allegany, 2 schools, 132 pupils Anne Arundel, 12 schools, 700 pupils; Baltimore Co., 11 schools, 490 pupils; Calvert, 10 Schools, 533 pupils; Caroline, 9 schools, 300 pupils; Carroll, 5 schools, 230 pupils; Cecil, 7 schools, 279 pupils; Charles, 15 schools, 925 pupils; Dorchester, 19 schools, 1184 pupils; Frederick, 14 schools, 751 pupils; Harford, 14 schools, 582 pupils; Howard, 6 schools, 238 pupils; Kent, 6 schools, 435 pupils; Montgomery, 8 schools, 468 pupils; Prince George, 9 schools, 409 pupils; Queen Anne, 12 schools, 664 pupils; St. Mary's, 12 schools, 512 pupils; Somerset, 7 schools, 468 pupils; Talbot, 8 schools, 617 pupils; Washington, 9 schools 455 pupils; Wicomico, 8 schools, 423 pupils; Worcester, 7 schools, 394 pupils; Total, 210 schools, 11,189 pupils. To which should be added Baltimore City, 15 schools, 2982 pupils, making an aggregate, of 225 schools, and 14,171 pupils.

Two difficulties, which it will take time to remove completely, have retarded the operations of these schools—the want of good teachers and the want of suitable buildings. As these obstacles disappear the number of children attending school will gradually increase. It is not unreasonable to expect an attendance of nearly 20,000 next year, and for this number a larger appropriation will be necessary. In making such a grant, it would be well to provide that it shall be distributed to such counties only as have properly

expended the amounts previously received. This suggestion is made in consequence of several counties having spent much less than their quotas during the year, the unexpended balance, amounting to nearly one-fourth of the whole amount received. In some cases the balance has been reserved for building school-houses, (it would have been better if houses had actually been built with it;) in others, no explanation has been offered. It should be mentioned in this connection that many counties have spent more than the amount received from the State Treasury; and that, generally speaking, where the white schools are best managed, there the greatest liberality is shown to the colored schools.

The lack of uniformity that is observable in all the school work of the State, is very conspicuous in these colored schools. The enrolment of colored pupils, in this their first year as part of the School System, is 8.6 per cent. of the colored population. But this proportion is very unequally distributed. In Dorchester it is nearly 16 per cent. of the population; in the adjoining county of Somerset, it is not 7 per cent; in Harford it is 12 per cent. and in Cecil, on the opposite side of the Susquehanna, it is 7 per cent; in Frederick it is 10 per cent. and in the adjoining county, Montgomery, it does not quite reach 7 per cent.

In most instances the annual reports of the colored schools have been rendered in the same form, and have embraced the same particulars as the reports of the white schools. In a few counties, however, the reports have been partial and fragmentary, the number belonging to each school and the daily attendance not being given; these items have been estimated. The limits of possible error in these estimates are very narrow, and the general accuracy of the results is not seriously impaired.

ASSOCIATION OF SCHOOL COMMISSIONERS.

The annual meeting of the Association of Public School Commissioners of Maryland, was held in Baltimore on the

25th and 26th of November. The counties of Allegany, Anne Arundel, Baltimore, Caroline, Carroll, Charles, Dorchester, Harford, Howard, Prince George, Queen Anne, Somerset, Talbot, Washington and Wicomico, with the city of Baltimore, St. John's College, and the State Normal School were represented. Much useful information respecting the working of the Public School System in the several counties was elicited; and great harmony and good feeling prevailed. The general opinion of the Association seemed to be, that the School Law on the whole was working well, and that while it would not be difficult to point out defects and suggest amendments, yet permanent improvement should be looked for, not from radical changes in legislation, but from such minor alterations as might easily be engrafted on it without disturbing its general principles.

On the following points the Association made a unanimous recommendation:

That Elementary Geometry should be added to the studies in which all teachers should be examined.

That Drawing should be taught in all the schools.

That the State Normal School is necessary to the prosperity of the Public Schools, and that a new and permanent building for its accommodation is indispensable.

A resolution that teachers should be appointed by the County School Boards, and not by the District Trustees, led to some discussion. A large majority was in favor of the resolution; but in deference to the opinion of a few to whom the Trustee system was not objectionable, a compromise was adopted, to the effect that "the appointment or removal of teachers by the District Trustees should be made subject to confirmation by the County School Boards."

On the subject of High Schools, the following resolution was unanimously adopted:

That the Boards of School Commissioners in those counties where no Public High Schools exist are hereby re-

quested to use their best efforts to secure the co-operation of the Trustees of the Academies in the establishment of such High Schools, and the appropriation of the Academic fund to this purpose, and, if necessary, to obtain such legislation as will effect the object of this resolution; also that the General Assembly be requested to authorize the Board of County School Commissioners to impose, when necessary, a small fee for attendance at the Public High Schools in order to support them."

A resolution that a larger appropriation should be made for the support of colored schools provoked considerable discussion, but was finally adopted.

The importance of this Association of School Commissioners as one of the educational agencies of the State can hardly be over-estimated. Being composed of men actually engaged in the management of the schools, familiar with their working, appreciating their merits, cognizant of their defects, and representing every section and every interest in the State, they are the safest counsellors to whom the General Assembly can look for advice in reference to the school system.

The suggestions which have been quoted are not of such a nature as to require any fundamental change in the Law, and yet they are of sufficient importance to claim special attention; and we do not hesitate to endorse them heartily.

The addition of elementary Geometry to the studies required from teachers of all grades will prevent the appointment of many persons whose principal qualifications are their necessities; and will go far to limit the profession of teaching to those who have made some special preparation for it. The absurd notion that any young man or woman who has learned to read, write and cipher in a primary school, and has committed to memory a few definitions in Grammar and Geography is fully prepared to teach school, must be abandoned before our schools can be made really efficient. Yet this false assumption is the theory on which both the employers and employed too often act.

An advertisement in one of the leading newspapers of Baltimore for a teacher of a Primary School near the City did not bring a response from any person who had ever taught school, or who had ever prepared himself to teach, or who had ever thought of teaching, except as a temporary relief in an unexpected emergency. Good teachers are scarce, partly because they are underpaid, but partly, also, because we have been so long content with a minimum of qualification. The supply rises no higher than the demand. By requiring some knowledge of Geometry we shall draw our teachers from a better educated class of persons,—from those who have pursued their studies with a view to the probability of their one day becoming teachers.

The argument that teachers need not know Geometry, because they are not required to teach it, hardly deserves a serious answer. "Nothing," says Gœthe, "is more frightful than a man who knows only so much as he is required to teach." One can teach even the alphabet all the better for knowing much more than the alphabet. Cannot, then, one who knows nothing but his letters teach the alphabet to children? Yes, after a fashion. But to teach the alphabet so as to make the act of learning at once pleasant and profitable; so as to gratify the natural desire of knowledge, and create an appetite for more; so as to call into exercise the latent faculties of the mind; so as to develop the powers of observation and comparison, and the faculty of imitation; so as to strengthen the memory by use, and aid it by fitting association; so as to leave the mind after every lesson more desirous of a new one, and better prepared to receive it—this is a task worthy of a philosopher. Surely we have a right to ask that those who undertake this work shall not only be able to read and write themselves, but shall also have some scientific knowledge, both of the laws of form, and the laws of mind.

DRAWING.

Geometry is asked for a part of the teacher's outfit for his professional work. Drawing is demanded as a study

of vital necessity for the proper education of children; and the propriety of the demand is acknowledged by all who have carefully studied the subject, both in Europe and America. Our school law leaves the teaching of drawing to the discretion of the school trustees. The mind of the average trustee is opposed to it, and his opposition may be traced to three sources: 1st, a misconception of the purpose of drawing as a school study, which he considers to be the making of pictures; 2nd, a notion that to draw requires some special faculty which he thinks but few children have, whereas children, in general, have as much taste for drawing as they have for writing or spelling; 3rd, an impression that the time spent in drawing is wasted, because it might have been given to something practical—arithmetic for example.

When we propose to introduce drawing into the schools we do not design to make artists of the scholars, any more than we design to make them mechanics, merchants, lawyers, or preachers. We propose to teach merely the elements of those Arts and Sciences which form the basis of every man's business. We propose to educate the eye, to train the hand, to bestow on the learner a new and universal language, to open to his view scenes of wondrous beauty, which would otherwise be invisible to him, and to give him access to an unlimited field of innocent pleasures which without this help he could never enter. Careful observation shows that the capacity for appreciating symmetry and beauty of form is at least as widely diffused as the capacity for enjoying music and poetry; and that the public schools under a proper system, can teach drawing as easily, as universally, and as successfully, as writing or arithmetic. Drawing is also a practical study, even in the most sordid sense of the word practical. It pays. The money value which a correct and highly cultivated taste would add to all manufactured articles in which beauty of form or color is an element, is almost incalculable. The general diffusion of elementary art-knowledge, among all classes of

the community might not give us many pretty pictures, but would give us what is of far more importance, an improved race of artisans, carpenters, builders, architects, gardeners, workers in gold, silver, iron and wood; even hatters, tailors, milliners and dress makers. We, therefore, cordially and strongly endorse the opinion of the Association that instruction in drawing should be given in all public schools.

SCHOOL COMMISSIONERS AND TRUSTEES.

The appointment and the removal of teachers are vested by law in the Board of District Trustees. The Board of County School Commissioners fix the salaries and pay the teachers; the Trustees decide (within certain limits) what branches shall be taught. The School Commissioners furnish the necessary books, and may order a certain fee to be paid for their use; the Trustees can, at their discretion, exempt any pupil from paying the book fee. The School Commissioners fix the beginning and end of the school term; the Trustees appoint the hours for beginning and closing the daily session. The Trustees are ordered by law to "attend to all repairs, and charge the cost among the incidental expenses of the school, to be paid out of the tax levied upon the assessable property of the county;" but it is provided that "when repairs are to be paid out of a County School Tax, the amount to be expended for said repairs shall be determined by the Board of County School Commissioners before the repairs are made." This division and sub-division of labor and responsibility tends, at some times, to produce antagonism, apathy at others, and confusion at all times. When the School Law is thoroughly revised, the respective duties of School Trustees and School Commissioners should be more sharply defined. The principle of division should be that the legislative function should belong to the one, and the executive function to the other.

In the matter of appointment and the removal of teachers it seems necessary that both boards should concur, and

we therefore endorse the recommendation of the Association of School Commissioners, that the teachers should be appointed by the District Board, subject to confirmation by the County Board.

COLLEGES.

St. John's College, Annapolis, reports 140 students in attendence during the year ending July 31, 1873. This is an increase of 20 over last year, and an increase of 2 over the number reported in 1871. Of the whole number 68 were in the college proper, and 72 in the Preparatory Department. The number of students entitled to free tuition is 150; the number availing themselves of this privilege is 98. The number of students entitled to and receiving Board and tuition free of expense is 50, of whom one is in the Junior class; 4, in the Sophomore; 54, in the Freshman; and 31, in the Preparatory. In the fall of 1876 these 50 young men, who have received board and education for four years at the expense of the State, are expected to take their places for two years among our teachers, according to the terms of their contract. The experiment will be watched with interest; and, in any event, it will lead to valuable results.

The Agricultural College reports 130 students, a decrease of 8, as compared with last year. At the close of the year the President, Rev. Samuel Register, D.D., resigned, and his place was filled by the appointment of General Samuel Jones of the University of California. Tuition in the College is now free to all young men in the State who are qualified to pursue its course of study. Instruction in Latin and Greek is given to all students who desire it, but the course is so arranged that those who have had no elementary training in classics have abundant occupation in the study of modern languages, Mathematics and Physics, Natural History, and Mental and Moral Science. It is a fundamental principle of the College that the study of science is not inferior to the study of classics, either as re-

gards mental discipline or future usefulness; consequently, no student suffers any loss of standing or respectability through not taking a full classical course. An appropriation of $3,000 by the Legislature is required for the purchase of chemical and philosophical apparatus; there is a very urgent need for it, and the investment will pay a high rate of interest in educational advantages.

Washington College, in Kent County, was attended during the past year by 23 students, of whom 9 received board, tuition and books, free of charge. We quote from the report of the Board of Visitors: "There were 5 graduates at the last commencement, all of whom were of good standing. During the recent vacation the college buildings have been thoroughly repaired, and are now in complete condition for the reception of students. The Faculty of the College has also been thoroughly re-organized and a third professor added. All the professors are men of large experience and distinguished ability, and the Visitors think there are substantial indications of renewed prosperity in the future. Under the able efforts of the Visitors and Faculty, the Visitors of the College confidently hope that their next report will give proof of substantial progress."

The College of the Future.—The munificent bequest of the late Johns Hopkins has placed in the hands of trustees selected by himself, a property estimated at not less than three millions of dollars, for the purpose of founding a University which is to bear his name. Not Maryland alone, but the whole civilized world, will watch with interest every step in the march of events, until the magnificent intentions of the testator shall be carried into effect. With ample means at their command, it will not be difficult for the trustees to raise an architectural pile that shall be a lasting memorial of its founder, and a fitting temple for the votaries of learning to worship in. With a yearly income exceeding the revenues of the wealthiest of American Colleges of the present day—and being thus entirely independent of patronage for its support—it is easy to believe that

it will attract to its halls as professors a fair proportion of the experience, the learning, the science and the philosophy of the country. Untrammeled by tradition, unfettered by superstition, unhampered by conditions—with all the wisdom of the past for guidance, and all the errors of the past for warning, may we not hope that the Johns Hopkins' University will be conceived in such a spirit, and be commenced on such a plan, as will warrant the expectation that it may one day become the National University of the United States?

STATE NORMAL SCHOOL.

The whole number of students enrolled during the year ending May 31, 1873, was 146. This is 16 less than the number reported for the preceding year; but the difference is more than made up by the fact that the students who entered remained a longer time, so that in fact the average attendance for the year was the largest on record, 114 students having been present at the final examination. The students were distributed as follows: from Allegany County, 2; Anne Arundel, 7; Baltimore Co., 18; Baltimore City, 59; Calvert, 2; Caroline, 3; Carroll, 2; Dorchester, 6; Frederick, 3; Harford, 6; Howard, 3; Montgomery, 3; Prince George's, 6; Queen Anne's, 7; St-Mary's, 2; Somerset, 6; Talbot, 3; Washington, 4; Worcester, 3; District of Columbia, 1. The number of graduates for the year was 13, of whom 12 are now teaching.

The whole number of students enrolled since the organization of the school in 1865 is 675. Of these, 325 were teaching in the Public Schools of the State when last heard from.

The whole number of graduates is 153, of whom 81 are of the highest grade, (Teachers of Grammar Schools). Of these 81, 74 are now teaching, 2 are engaged in other employments, 4 (ladies) are married, and one is dead. Wherever they have been employed, they have given satisfaction to their employers. The school is willing to rest its reputation on the work done by its graduates.

We renew the request so often made before, that the Legislature would make an appropriation to build or purchase a house suitable to the wants of the School.

If the Public School System is to continue, the Normal School must continue to be an essential part of it; and a permanent building is essential to the continuance of the school. The house now rented may, and probably will, pass away from our control in July next. We rely on the wisdom of the Legislature to provide that this large, flourishing and popular school shall not be dissolved for want of accommodations.

EDUCATION OF WOMEN.

We desire to call attention to the fact that the State Normal School is rapidly becoming a College for women, exclusively. The number of young men in attendance has always been small, never more than 17 per cent. of the whole number of students. In 1872 there were 28 young men; in 1873 there were 13; in 1874 there are only 8. The appropriation of $10,000 a year for the free boarding of such students of St. John's College as will pledge themselves to become teachers, seems to indicate the intention of the Legislature, that St. John's College should become the Normal School for men. Under these circumstances we respectfully ask that the State Normal School should be open to women, exclusively. In making this recommendation we wish it to be distinctly understood that so far as the principle of the co-education of the sexes is concerned, our experiment has been a complete success. If the two sexes were equal, or nearly equal in numbers, no change would be asked for. But it is evident that a school consisting of 140 students of one sex, and only 8 of the other, must work awkwardly for both parties. If we believe that woman needs education as much as man, that she is as capable of receiving it, and will make as good use of it, it will be hard to explain the reason why the State has done so much for the education of men and so little for the

education of women. The Public Schools and the State Normal School are open alike to both, but there the equality ends. We spend $40,000 in Colleges and Academies for the education of young men separately, and only $5,000 for the education of young women. And part even of this small sum is expended uselessly for education, no higher and no better than that which may be obtained at the District School.

If this question of higher education could be considered in the light of our present necessities, apart from traditional associations and local interests, it would be easily perceived that Maryland cannot afford to maintain more than two State Colleges, one for men and one for women; and that, by a judicious expenditure of the money now appropriated, without calling on the State for any additional help, two Colleges of high standing could be maintained creditable to the reputation of the State and useful to her citizens.

NORMAL SCHOOL FOR THE EDUCATION OF COLORED TEACHERS.

This Institution is now in the eighth year of its existence. The number of different pupils in all departments (Normal, Grammar and Primary,) is 234, and the average attendance 186. The number in the Normal Department is 74. There is a well selected library of over 1000 volumes, but no philosophical or chemical apparatus, a want which ought to be supplied as soon as possible. All the pupils pay for their tuition, but the receipts from this source and from the State treasury are not sufficient to meet the necessary expenses. We commend this excellent and indispensable school to the generous liberality of the State.

There are, at this time, 72 of the students employed as teachers in the various counties; and, so far as we have heard, they are doing good service. We suggest that the certificate or diploma of this school should be made a legal qualification for teaching in colored schools.

THE ACADEMIES.

We renew our annual protest against the way in which the Academic donations are distributed, and the purposes for which they are used; and we again invite the attention of the Legislature to this subject. We state briefly, without argument, the following principles which, we think, will bear examination.

1. No public money should be given to any College or Academy which is controlled nominally or actually by any religious denomination.

2. No public money should be given to any College or Academy that is conducted simply as a private and personal business enterprise.

3. No public money should be given to any School, Academy or College, unless the State has a representation on the Board of management in proportion to the money expended by the State.

4. Public money granted for one purpose should not be applied to any other purpose.

The rigid application of these principles would prevent many of the abuses of which we now complain.

MARYLAND INSTITUTE SCHOOL OF DESIGN.

The schools of the Maryland Institute form a very important part of the educational agencies of the State. Nearly three hundred young men, most of whom are busily employed during the day in the active duties of life, assemble in these schools in the evening, for the study of Chemistry, Book-keeping, Music and Drawing. The Drawing classes are the largest, the most important, and the most interesting. Prof. Woodward reports that they are twelve in number.

"1. The Elementary Class, 182 pupils, engaged in drawing from flat studies.

2. The First Preparatory, 40 pupils, drawing from flat studies of a more difficult character than the preceding.

3. The Second Preparatory, 67 pupils, engaged in pencil drawing, from the round.

4. The Third Preparatory, 31 pupils—advanced studies from the same.

5. Geometrical Class, 41 pupils—applied Geometrical drawing.

6. Fourth Preparatory, 29 pupils—details of Mechanical and Architectural Drawing.

7. Perspective, 12 pupils—pencil drawing from the flat and round.

8. Artistic, 3 pupils—same as the above in Design.

9. Mechanical, 4 pupils—drawing of Machinery and Mechanical Engineering.

10. Architectural, 12 pupils—Architectural Drawing and Design.

11. General Drawing, 9 pupils, including all the above.

12. Graduating Class, 11 pupils, including the Fine Arts, Architectural, Mechanical, and Mechanical Engineering."

The annual appropriation to this school from the State Treasury is $3000, which hardly enables the Directors, with all the aid they can get from other sources to meet the annual expenses. There is a pressing demand at the present time for better accommodations, the rooms now occupied being inconvenient and uncomfortable, and we hope that the joint liberality of the City and the State will place this Institution in a position to extend to the students the aid and comfort which they deserve, and to diffuse a knowledge and a love of Art among the masses of the people.

BENEVOLENT EDUCATIONAL INSTITUTIONS.

The Institution for the Deaf and Dumb at Frederick continues to prosper. It is attended by 85 pupils, 52 male and 33 female. Of these, 79 receive board and tuition free. The pupils are arranged in three divisions corresponding

as nearly as possible to the High, Grammar and Primary Schools of the counties. A class composed of members from all the divisions receives special instruction in Articulation and Lip-reading. We are glad to bear testimony from our own observation, to the fact that the education in this Institution is conducted on sound principles, and is as philosophical in its spirit as it is practical in its details. We regret to know that the Institution is destitute of philosophical and chemical apparatus. This would be a great draw-back to any learners, but to those who are deprived of hearing, and to whom touch and sight are the only inlets of knowledge, the lack of proper objects on which to exercise those senses, and by that exercise to develop the mental powers, must prove a far greater disadvantage than to ordinary students. We hope that the liberality of the General Assembly will enable the Trustees to supply the Institution, before long, with all the apparatus that can be profitably used.

The Institute for the Blind, Baltimore City.—At the date of the last report, this Institution contained 48 pupils, the majority of whom are residents of the City of Baltimore, thirteen only coming from the counties, and five from the District of Columbia. There are at least 20 blind children in the State who ought to be in this Institution, and who can be comfortably accommodated, but who have not applied for admission. Teachers and School Officers who may meet with such persons are requested to call the attention of their parents and guardians to the advantages offered by this admirable Institution. Any additional information that may be needed, will be cheerfully furnished by the Superintendent, Mr. F. D. Morrison.

The Institution for the Colored Blind and Deaf Mutes was opened on the 2nd Oct'r, 1872, at 92 S. Broadway, Baltimore, and 6 pupils were admitted. Every facility has been provided here for the comfort and education of these colored children. The building and grounds are

peculiarly well adapted to the purpose of the Institution, and the accommodations are ample.

The McDonough Institute was opened on the 22nd of Nov'r, when 41 pupils were admitted. The object of the Institution is, in the words of the founder, to give "instruction in the Christian religion, a plain English education, Music and the art of Husbandry or Farming to poor boys, of good character, of respectable associations in life, residents of the City of Baltimore." For this purpose, John McDonough left his entire property, valued then at several millions of dollars, to the Cities of Baltimore and New Orleans. The war, lawsuits, and various casualties, seriously diminished the value of the property; still, the amount realized by the City of Baltimore, is in excess of $725,000. With this, a farm of 833 acres of good land was purchased near the City, and a house fitted up temporarily for the accommodation of 50 pupils. It is reckoned that after the permanent buildings are erected the Trustees will have an annual income sufficient for the maintenance and education of 250 boys.

The Manual Labor School, the nature and purpose of which have been stated in a previous report, is still continuing its good work; but no report has been received of the number of boys in attendance.

POSTSCRIPTUM.

While this Report was being written the Civil Rights Bill was under discussion in Congress. This Bill, if enacted into a law, would give the colored people the right of admission, on the same terms as white persons, into every public school in the State, every High School and every Academy receiving State aid; into the State Normal School, St. John's College, Maryland Agricultural College, Washington College, the Western Maryland College, St. Mary's Female Seminary and the Baltimore Female College; into

the Deaf and Dumb Institution, and the Institution for the Blind; in the comprehensive language of the Bill, into "benevolent institutions, or any public school supported in whole or in part at public expense, or by endownment for public use." Neither the lessons of history nor the admonitions of philosophy can have much weight with the authors of this measure; for both history and philosophy teaches us that the social habits of a nation cannot be regulated by statute. At the present moment it is the opinion of those best qualified to judge that the Civil Rights Bill will not pass, at least with the offensive school-feature unmodified. But we know not what a day may bring forth, and it is the part of wisdom to be prepared for disagreeable probabilities.

There is no danger of having mixed schools in Maryland, whatever enactments Congress may make. Before such a thing could become general there must be a social revolution, such as Acts of Congress may retard but cannot hasten. When the black race shall have risen to the same social level as the white race, it will need no Civil Rights Bill to give them equal privileges in the same school. But until that time shall come, Congress might as well pass a law that oil and water shall stand at the same height in the same bottle. Legislate as we please, each will take its own level in obedience to natural laws; and agitation cannot produce a mixture, though it may prevent a settlement.

The school is only an extension of the family. The school master says, the law, stands *in loco parentis.* The custom that places blacks and whites in separate schools is only a branch of the same general law which brings like elements together, and separates unlike elements in social life. The people of Maryland are willing and anxious to provide good free schools for all the children within their borders, white or black, but they are desirous of doing it in their own way.

There is no evidence that the colored people in Maryland desire admission into white schools, and there is reason to believe that, even in the event of the Bill passing in its present shape, firm and judicious management would preserve our school system intact. But, as it is impossible to provide definitely for all contingencies by State legislation, we recommend that the Governor of the State and the Attorney General be added to the State Board of Education; and that the Board thus constituted shall have power to enact By-Laws for the administration of the public school system, and to close any school, and to suspend or remove any teacher, when they consider it necessary.

(Signed,)

M. A. NEWELL, *President.*
P. A. WITMER,
GEO. M. LLOYD,
GEO. F. BEAVER,
SAMUEL KEPLER, *Secretary.*

ALLEGANY COUNTY.

ANDREW GONDER, *President*, GEO. G. McKAY, *Secretary*

OFFICE OF THE SCHOOL BOARD
Of Allegany County, Md.

CUMBERLAND, Nov. 14th, 1873.

HON. M. A. NEWELL,
President State Board School Commissioners, Md:

Dear Sir:—We have the honor to submit the Annual Report of the Free Public Schools of Allegany County for the School year, ending September 30th, 1873.

This Report embraces the statistics of the Schools of Garrett County in addition to those of Allegany. The County tax was levied with a view to the support of the Schools of Allegany County undivided. When the division was consummated, January 1st, last, the Board of Allegany County passed a resolution continuing the Schools within the limits of Garrett County as if no division had taken place, which was carried out in good faith. We were induced thus to act under the belief that Allegany County would receive all school funds arising from State and County regulations for the fiscal year just ended, the latter was received in full, but the former was divided, and a portion given to Garrett County. We have no doubt, however, that the arrangement as understood will be carried out by the Garrett County School Board.

The Financial condition of the School Board is excellent. No bill payable is now outstanding.

By a recent act of the Legislature, a County Treasurer was appointed to disburse the funds according to the levy.

None have felt the great advantage of this arrangement more perceptibly than the School Board: we desire here to express publicly our high appreciation of the gentleman, R. Shriver, Esq., holding that position, for the straightforward, prompt and obliging manner in which he has at all times met the requirements of our Board.

We have built and contracted for more school-houses this year, than any previous year, and will be able to pay all contracted for, within the school year now begun.

The great hindrance to the complete success of the Free Public School system is rapidly disappearing; every populous School District in the County will be supplied with a good and commodious house, before the year now begun is closed.

The schools are making marked progress. The teachers generally, have done their work efficiently, and have given evidence, that the County Institute was not held in vain, and that the money spent by the Board for its encouragement was returned with increase; teachers being imbued with greater love for their calling, and throwing more zeal and system into their work.

Those who merely keep school and hear lessons are gradually disappearing from the profession; but the Teacher who is an Educator in fact, is not only sought after, but highly respected. The people are alive on this subject, and none but good Educators will satisfy them, which is certainly a very excellent symptom, and cannot fail to bring about the time, when the schools of Allegany will be kept open ten months in the year, and good teachers receive such remuneration for their services as will induce them to make teaching their sole profession.

Respectfully submitted,

GEO. G. McKAY,
Secretary.

ALLEGANY COUNTY—SUMMARY OF SCHOOL STATISTICS.

For the Year ending September, 1873.

PROF. M. A. NEWELL.

President State Board of Education :

Dear Sir :—We respectfully submit the annual Report of the Board of School Commissioners of Anne Arundel County, ending September 30, 1873.

During the past year, Mr. Addison Johnson, for years identified with the schools of the county, as an able and efficient officer, resigned his position, and Mr. James S. Robinson equally as able and efficient, was appointed in his place. The present Board, Messrs. Daniel T. Hyde, Dr. N. S. Knighton and James S. Robinson, have been untiring in their efforts to promote the efficiency of the schools. The Statistical Report for the scholastic year, shows an increase both in the number and average attendance of the pupils. Financially, our condition is sound, having during the past year nearly finished paying off the old debts contracted as far back as Mr. Van Bokkelen's administration, and having a sufficient amount in the hands of collectors to pay off all our indebtedness. During the year we have built and furnished three school-houses. In consequence of having lost three school-houses within the last few years by fire, all the school-houses in the county have been insured by the Board in the Mutual Fire Insurance Company of Anne Arundel and Howard Counties. Twelve colored schools are now established with an average attendance of 360 pupils. The sum of one thousand four hundred and eighty four dollars and eleven cents is now due the colored schools, and has been placed to their credit, and will be paid by the School Board, whenever the requisition of their schools demands it.

The County Commissioners with commendable liberty, have levied the amount asked for by the Board of School Commissioners, viz: $15,881, a sum sufficient to pay for building the three school-houses, and meet all other liabilities of the Board.

The anxiety manifested by parents to get their daughters in the Normal School, in order that they may be qualified for teachers, as well as the desire of District Commissioners to obtain graduates of the Normal School, as teachers, conclusively prove the deservedly growing popularity of the Maryland State Normal School, whose efficiency as an educational Institution under your able management, has been productive of incalculable benefit to the Public Schools of Maryland.

Very truly yours,

WM. H. PERVEIL,

Secretary.

BALTIMORE COUNTY.

WM. M. ISAAC, *President.* DR. SAM'L KEPLER, *Secretary*

PROF. M. A. NEWELL,

President State Board of Education:

The Report of the Public Schools of Baltimore County for the year ending September 30th, 1873, is herewith respectfully presented.

As will be seen by the accompanying tables, a large sum of money has been disbursed for building, repairing, and furnishing school houses; and as a complete history of these improvements cannot be obtained from the tables alone, a summary account of them will not be out of place in this statement. In the First Election District, school house No. 2, at Catonsville, has been enlarged by the addition of two rooms, each one 24x18 feet. This house will now accommodate one hundred and fifty pupils. At the Union Factory, in the same district, a stone house 48x 26 feet, having two rooms, has been built on a lot donated to the Board by the Union Manufacturing Company. This house will seat one hundred pupils. In the Third District, two brick houses have been built, each 30x24 feet, known as Nos. 6 and 7. The lot for No. 6 was donated by Mr. Lewis Dehoff, and that for No. 7, by the neighborhood. Each lot contains one-half acre of land. In the Fourth District, a brick house 30x24 feet, known as No. 4, has been built on a lot donated by Mr. Henry Schwartz. In the same district No. 7 at Owings' Mill, has been enlarged by the addition of a room 24x16 feet. In the Fifth District, a stone house 30x24 feet, known as No. 6, has been built on a lot of one-half acre of land, donated by the neighborhood. In the Sixth District, a brick house 30x24, (No. 7,)

has been built on a lot donated by Wm. H. Hoffman. In the Ninth District, schoool house No. 1. Huntingdon Avenue, has been enlarged by an additional room 24x16 feet, and by a vestibule 16x9 feet. It will seat one hundred pupils. In the same district at Towsontown, a two story brick house 50x36 feet, with cellar under it, has been built.

There are two rooms on the first floor, divided by a glass partition, and one room above, which is used as a class room, and also as an assembling room. The necessary cloak rooms have been provided. The lot cost $1000, is 100 feet wide by 180 deep, and is divided into two parts by board fence. A house similar to the above, in almost every respect, has been built at Waverley. The lot which cost $2,500, is 100 feet wide by 100 deep, and is divided as the lot at Towsontown. Both of these houses are well built, present a fine appearance, and have been long needed. In the Tenth District a frame house 24x24 feet, has been built on a lot donated by Messrs Jas. G. Stansbury, David Johnson and Benjamin T. Johnson. The neighborhood assisted in erecting this house, by furnishing materials or labor. This is the only frame house built by the Board during the year. In the Twelfth District, a brick house 40x26 feet, known as No. 3, has been built. All the brick for this house were delivered by the neighborhood without charge. The front of this house is of pressed brick.

All of these houses have a cellar under the vestibule for the safe keeping of fuel, and all of them are furnished with new furniture. They are built of the best materials, and not one of them has cost more than a fair price, which facts are attributable to the careful supervision of the Committee on School Houses, especially of the Chairman of the Committee Wm. M. Isaac Esq., President of the Board, who by his practical knowledge of building, and by his attention to this work, has rendered valuable service to the Board.

In addition to the above, eight more houses are in building, further notice of which belongs to the report of next year.

Many houses have been thoroughly repaired, and in a large number of old desks have been replaced by new ones. The amount expended for building, repairing and furnishing is $34,533,06. This is much greater than any sum heretofore expended in our County, in the same space of time, for similar purposes. There remains yet much to be done, to put all of our school houses in the condition in which they should be.

In last year's report mention was made of the plan of classification of teachers' certificates adopted by the Board; while it is evident that there are only two grades of certificates known to the law, yet the Board felt that it did not exceed its authority in making the salaries of teachers dependent upon their scholastic attainments as determined by examination. This plan was accordingly adopted, with the expectation that teachers would be induced to perfect themselves in the branches of study in which they are required to be examined. There has been no disappointment in the result expected, for our teachers have exhibited a praise-worthy desire to stand in the highest class, not only on account of the pecuniary advantage, but also from a wish to maintain in the eye of the public a good standing as teachers. This they find the more desirable as an annual list is published, in which the grade and class of every teacher are given, from which list Trustees select teachers for their schools. Those teachers, therefore, who stand well in the official list, have that advantage in their favor when applying for positions. Having given this plan of classification a fair trial, our Board is satisfied it acted wisely in establishing it, would it not be well if the law required all certificates to bear upon their face the per centage of questions answered by the holder in every branch of study in which he has been examined? Several advantages which need would not be stated here, result from such a provision of law.

It may not be improper, just here, to say a few words in reference to our teachers; and, disclaiming to speak well

of them undeservedly, it may truly be said, that, as a body, they are efficient, and devoted to their profession While some have improved but little during the past five years, in respect to the majority of them, the reverse of this is true. A number have, by diligent study, gained our highest certificate; while others, who have not been so successful, have taken, at least one step in that direction. That many have increased their usefulness in the school-room, has been evident to the Examiner, in his official visits to the schools, which other duties have caused to be fewer and briefer than he could wish. As a corps, therefore, our teachers are improving, and those who are not doing so are gradually dropping out of the profession. While it is pleasant to record this improvement, it is scarcely necessary to add that there is ample room for still further advancement, and no teacher should think for a moment, that he possesses such a complete knowledge of his profession as to justify him in ceasing to study. Not only is it important to be well grounded in the different studies taught, but it is equally so to be intimately acquainted with the best methods of teaching them. Teachers, therefore, should be eager to make use of every assistance they can obtain in the study of their profession; such as works upon teaching, school journals, &c.; and when any of them find that there is nothing further for them to learn, they would do well to turn their attention to some other occupation.

As was to be anticipated, much doubt and hesitation were felt by our Board, as to the propriety of establishing a class of schools entirely new to the school system of our County. Petitions had been received by the Board, urging the organization of High Schools. It was felt, that these appeals could not be slighted, and that the time had arrived when it became necessary to make some provision for higher education. Accordingly it was resolved to make the trial. Three High Schools are at present in operation, one at Towsontown, one at Waverley, and one at Woodberry, these places being centres of a large population.

An offer was made by the Board, to the trustees of Franklin Academy, at Reisterstown, to enlarge the building and establish therein a High School, provided they would convey the property to the Board. It was understood at one time, that they were willing to make the conveyance, but as yet, no official notification to that effect has been received from them.

It is too early, perhaps to draw conclusions as to the ultimate success, in every respect, of these schools. If the attendance of pupils may be regarded as such an indication, then there is no ground for fear of failure. When the scholastic year closed, June 30th, 1873, there were 69 pupils enrolled in the Towsontown public school. At the present writing, the school now being a High School, the pupils number 195. Waverley High School numbers about the same, and the one at Woodberry will probably be the largest school in the County, when the house is finished.

In establishing these schools, it has not been the purpose of the Board simply to benefit the immediate neighborhood in which they are placed, but to afford the citizens of the county, generally, an opportunity of giving their children a better education than can be obtained in the primary schools. It is not intended to place a High School within walking distance of every citizen's house; but it is proposed so to locate these schools, that all who desire can send their children to them at a very reasonable expense. Heretofore, those wishing greater educational advantages for their children than could be secured in our public schools, were compelled to send to private schools, at a heavy cost, and in many instances beyond the limits of the County. Now while some of our citizens have necessarily less inconvenience in obtaining the benefits to be derived from these schools than others, because they reside near them, yet every one enjoys, or will soon enjoy, facilities for higher education unknown to the people of our county before the establishment of High Schools. These Schools must of course, be comparatively few in number. A primary school

is within two miles of the house of every inhabitant of the County; and if, after the Board shall have organized as many High Schools as are deemed necessary, every citizen finds one within fifteen or twenty miles of his house, the County will posses facillties for higher education unsurpassed by any county in the State. Besides the educational advantages afforded by these schools, it is expected that others will result more or less beneficial to the County. It is a well-known fact that the majority of public school teachers receive their education in the public schools; the knowledge they possess of branches taught, as well as of the art of teaching, they have obtained from the teachers of these schools. In some instances they have had the benefit of good training and discipline, in others they have not been so fortunate. When they become teachers, they seldom fail to adopt, in their teaching, the plans and methods by which they were taught, good or bad. Persons now wishing to qualify themselves for teaching, by attending the High Schools, have better opportunities for becoming fitted for the duties they are to assume, than have heretofore been obtainable. Again, these schools are expected to maintain an advanced position, not only in regard to the branches of study taught therein, but also in regard to governing, discipline, and methods of teaching. Teachers, whose experience has been limited, by visiting these schools, can perhaps learn something which will assist them in the management of their own schools. These High Schools, therefore, if well conducted, cannot well fail of exercising a good effect upon the other schools of the County; and it is needless to refer to other beneficial results that will follow their establishment. The course of study will fit students for admission to the freshman class in College.

Our County School Tax remains unchanged, being fourteen cents in the hundred dollars. This affords a sufficient revenue for the support of our schools, one year with another, and no increase of the levy therefore is re-

quired. The law of 1868 empowered School Boards to determine the amount to be levied for school purposes in the respective counties of the state, and the County Commissioners were required to levy and collect the amount designated. While this law existed, not an instance occurred, it is believed, in which the amount demanded was deemed burdensome by the people. The disposition of School Boards is to ask for as small a levy as possible from the County; and having shown no inclination to be exorbitant in their demands when they had the power to be so if they had wished; and possessing a more thorough knowledge of the amount needed for the support of the schools than those not connected with their management; a liberal policy and a prudent economy would suggest the propriety of providing such an amount of money as the Boards might after due consideration declare to be necessary. The injury done to the schools of a County by an injustifiable reduction of the school tax, is not easily calculated. If an insufficient sum of money is provided for the mending of roads, the roads are not mended—that is all. If the means for keeping the schools in operation are inadequate, the schools are closed—but that is *not* all. The work of years may be thrown away by closing the schools for one term. The teachers trained to familiarity with the working of the schools of the County, become dispersed over the State, or beyond its bounds; school-houses and school apparatus are left unguarded and at the mercy of the evil-disposed; time is lost by many pupils which in all probability, will never be regained; and other injuries are inflicted upon the schools and pupils not for a moment to be compared with the trifling reduction mode in each individual tax-bill. If public schools are desirable, and are to be maintained, let them be provided with the means to conduct them efficiently. Good school houses cannot be built, good teachers cannot be had, nor can books and school apparatus be supplied, if the means is furnished insufficient. It is not the part of wisdom to starve the Public Schools: better-

abolish them at once than let them die a lingering death. It is believed that our schools are appreciated by the people of the County, and no complaint is made when a reasonable amount of money is asked for their maintenance. Knowing these facts, it has been the endeavor of the Board, as well as of its predecessors, to make them worthy of the esteem and support of the people.

There has been but one change in our book-list during the year—the substitution of the "New American Readers" for "McGuffeys" series. A large number of black-boards have been furnished the schools during the year, and there is perhaps at present, not a school in the county unsupplied. Several schools have full seats, outline maps, the Board paying one-half the cost of them, and the teachers collecting the balance by contributions from the pupils of the schools. It would be well if they were in all of our schools, but the cost of furnishing them would be great. Perhaps all the schools in the State would be benefited by being as well supplied with school apparatus as they are with text-books.

During the year there have been twenty-two meetings of the Board, and many questions affecting the welfare of the schools have received careful consideration. The building and repairing of so many school-houses have materially added to the labors of the Board. The reports of teachers and other accounts have been thoroughly examined at each quarterly meeting by the Committee on accounts, Messrs Keech and Slade, and when the number of schools, white and colored, is considered, it will be seen, that the labors of this committee have not been light. No important changes have been made in the by-laws, but a number of regulations tending to increase the efficiency of the schools, have been adopted. The Board has been of the opinion that some changes in the present law are desirable; and at one of the recent meetings the following resolution was adopted:

"*Resolved*, As the sense of the Board of County School Commissioners of Baltimore County, that the efficiency of the public schools in this County,

would be much increased if the teachers of the various schools were elected by the School Board instead of being appointed by the trustees of said schools, and we respectfully request the members of the next Legislature of this State from Baltimore County to favor an amendment of the present school law, so as to give the election of teachers to the School Board instead of to the trustees."

Our Teachers' Asssociation has been well attended at each of the four meetings during the year, and the interest taken in its proceedings by the teachers has perceptibly increased. To a very great extent, the members of the Association depend upon themselves to conduct the exercises at the different meetings, and it is seldom that any one not connected with the public schools is requested to take part therein. The Superintendent of the State Normal School has been present at each meeting, and has not failed to bestow a "word in season." At the beginning of the year the Board very properly assists in defraying the expenses of the Association, having appropriated fifteen dollars for each meeting.

The tables show the number of colored schools in operation, the amount expended for their support &c. More money has been spent in maintaining them than has been received from the State. Since the close of the scholastic year, several more colored schools have been established. The Board is desirous of making as ample provision as it can for the education of colored people. Considerable difficulty is at present experienced in obtaining suitable teachers for these schools, but this perhaps will not be of long duration.

SAMUEL KEPLER,
Examiner.

BALTIMORE COUNTY—SUMMARY OF SCHOOL STATISTICS.

For the Year ending September, 1873.

	1873.	1872.
No. of School Houses, (82 frame, 23 brick, 10 Log, 19 stone)	134	120

RICHARD STANFORTH, *Secretary.*

Indebtedness $756 02

CAROLINE COUNTY.

COL. JAS. E. DOUGLASS, *Pres't.* REV. GEO. F. BEAVEN, *Sec'y*

PROF. M. A. NEWELL,
Principal, State Normal School.

Dear Sir:—The Board is pleased in this its annual report, to be able to say that the condition of the Public Schools under their care and management, has been, on the whole, very encouraging and hopeful. The teachers, in general, have well and faithfully done their work, and seem more to realize under the State provision for Public Education, that teaching has become a permanent profession, that is demanding more and more a definite and thorough preparation as to scholarship, and a lively, passionate interest in the instructor for his work.

The Board has been careful to elevate the standard for examination of applicants for certificates, and in this way has striven to secure more competent teachers.

The people, too, are showing more interest in the cause of Public Education, as is evidenced in their frequent and urgent appeals to the Board for new school-houses, as well in localities where there are none, as in lieu of old and dilapidated ones. Three new school-houses are approaching completion; one of these, a handsome building in the town of Federalsburg, will soon be ready for occupancy and use. Two others will soon be commenced. Let it be said to the praise and credit of the patrons in their respective districts, that in the erection of some of these structures, they more or less generally aid the Board by their contributions.

Nine colored schools have been kept in operation as long as the funds, at the command of the Board would warrant. The inadequacy of means is necessarily

in the way of the efficiency of these schools, for competent teachers cannot be procured to teach for so short a timeon so small a salary. The Board is endeavoring to make the most judicious use of the funds that come into their hands for the maintenance of these schools.

The County Commissioners granted a levy of $7,000, for use in the ensuing year. The Board as usual, has closed the financial year free from debt, with, besides the balance reported in their favor now in Bank, about $800 of last year's levy still in the collectors' hands. There is now on hand about $900 worth of books and stationery.

The Secretary would have it stated to the State Board, that owing to his bad health, and the inclemency of the past winter, he did not make the required number of visits to the schools, and would ask their indulgence.

Respectfully submitted,

JAMES E. DOUGLASS,

President

CARROLL COUNTY.

WILLIAM REESE, *President.* J. M. NEWSON, *Secretary.*

In submitting the Annual Report this year, we have few remarks to make. Nearly all that we would have to say, would be in relation to some better mode of appointing the teachers; a uniformity of text-books for the whole State; a specific *legal* method of placing supplies in the schools: payment for service rendered by the trustees, and kindred subjects, on all of which, (given in former reports,) our views remain unchanged; but we see no useful purpose to be gained by repeating the reason for our convictions.

With the exception of two notes, together amounting to $4,500 given by a former Board to parties who do not wish payment of the principal, the whole heavy indebtedness of about $24,500 existing when the present Board came into office, has been liquidated; but our receipts from all sources are insufficient to enable us to increase our teacher's salaries, which are much to low too attract the best teaching talents to our service.

Until our County Commissioners become more liberal in their assessments for school purposes, or until the law shall be amended so as to *require* them to comply with the demands of the School Board, we do not see how we can be enabled to pay competent teachers adequate salaries, nor how the school-houses still needed can be built.

In May last, when the county taxes were about to be laid, an urgent demand was made for an assessment for school purposes of fifteen cents on the hundred dollars; but the County Commissioners accorded only twelve cents, a

sum quite insufficient to enable the School Board to pay the debts then due, and to increase the teachers' salaries to a fair compensation for efficient service.

By making due allowance for the natural results from a deficiency of funds, the consequent murmurs of worthy teachers, who are not adequately paid on the one hand, and of childless tax-payers on the other, we feel confident that the public schools of Carroll County are in a much better condition, and are much more popular with the whole people of the County than they ever have been.

By comparing the accompanying tables with the report of last year, it will be seen that the number of pupils on the rolls has increased by over 800; and, had it not been for the extensive prevalence of SMALL-POX, and for the unusually severe winter which kept nearly all the younger children from school for several months, the average attendance would have been perhaps 25 per cent. greater.

We had five schools open for Africans, and preparations are being made for two more; but in six of our election districts, it appears they are not "colored" pupils enough to justify the expense of opening schools. Two of those which were opened, attracted so few pupils that the Board has yet taken no measures to re-open them for the ensuing year. Our experience with African schools leaves the impression that "colored" education in the rural districts of Maryland, will have a very limited success, whatever it may promise to be in the cities.

J. M. NEWSON,
Secretary, &c.

Indebtedness September 30th, 1873 ..... $4,500 00

CECIL COUNTY.

F. S. EVERIST, *President.* JNO. SQUIER, *Secretary.*

PROF. M. A. NEWELL,
President State Board of Education :

We would report to you that the schools of our County have been kept open during nine months of the past year. As regards their efficient working, they have not declined; on the contrary we think that they have advanced in this respect. Several new School Districts have been created, by the division of old ones, in order more fully to meet the wants of the pupils. Such is now the condition of the various School Districts, that there will be no necessity for much change in the future.

The teachers of the Schools seem to be earnest and diligent in their work; and by means of Teachers' Associations, and a free interchange of views in reference to their work, are qualifying themselves for a more thorough discharge of their duties. We think the Institute held under your supervision, in March of the past year, has had a good influence over the teachers in giving a fresh impulse to their minds, and by giving more enlightened views of their duties and responsibilities.

We have built, during the year, four new school houses, and greatly altered and repaired several others; so that with a few more new houses the whole County will be supplied. It should be stated that all the houses are built in the best manner, after a careful examination of various plans, and in accordance with the wants of the districts in which they are built.

You will see by the Annual Report, that the Colored Schools of the County, are placed upon the same footing with the others in all respects, and are included in the body of the report, and are numbered 1, 2, &c., in their respective districts. They are well conducted; the School Board insisting that the teachers of these schools shall be fully competent for their work.

We have nothing further to report of special interest in regard to the schools, except to say that in some instances the Trusteeship, as now existing in the law, has given some trouble, and is rather awkward in its workings, with reference to the appointment of teachers and the assistants.

Notwithstanding these drawbacks, the present School law is working well, and doing an efficient work in our county, for the education of the young, and qualifying them for the active duties of life.

JNO. SQUIER, *Secretary.*

Indebtedness September 30, 1873 ..... $37 60

DORCHESTER COUNTY.

DR. EUGENE HODSON, *President.* DR. JAS. L. BRYAN, *Secretary.*

It is to be regretted that a carefully prepared statistical and financial report should need any explanation, and yet there are two or three points in the accompanying one, about which a few words may not be out of place. By comparing it with the one for 1872, it will be seen that the enrollment of white children is slightly less, and a further comparison of the names of teachers employed in the schools, will show that nearly one-third are new teachers. The two facts should go together, as a change of one-third of the teachers annually, and the introduction of as many new and generally inexperienced ones, will account for the reduced attendance. In fact, the mere reporting of new pupils each term after the first, cannot be learned it seems, by these inexperienced teachers in one scholastic year. Your Examiner inclines to the opinion that the number of pupils enrolled this year is as great as last year, and yet it could not be ascertained from the crude reports submitted. The third difficulty in keeping up the number, arose from the loss to the children of one term's teaching. The average increase each term in a four term year, is nearly one hundred and fifty, and when we teach only three terms, this average increase is not obtained. This number added to the number reported, would have put our enrollment above that of last year. There is much consolation, though, in the fourth fact to be mentioned, that the amount withdrawn from the support of the schools, was applied to the

building of school-houses to take the place of the many wretched ones in use in former years. The same state of affairs must continue for at least one year longer, after which the regular terms will be taught, and possibly larger salaries paid to teachers. It is easy to imagine the result; with good, and in many cases new houses, with a four term arrangement, with better salaries and in consequence better teachers retained, the schools must become better and better, and the attendance be largely increased with a commensurate benefit to the pupils.

In this report, the first formal notice of our colored schools is made. They number nineteen, and were taught by two white and eighteen colored teachers and assistants, and were attended by nearly twelve hundred different children. The schools are generally kept in the churches belonging to the colored people, though there are seven good houses specially used for school purposes. In some neighborhoods, the colored people are making great efforts to obtain suitable houses, and we may hope that with the aid afforded them by persons of all classes, their wishes may be attained.

During the past year, the Pennsylvania School Journal was furnished by the Board to all of the teachers in the county, and the Examiner has no doubt whatever that the expense incurred was largely returned to the community by the benefit derived from this excellent periodical by the teachers. The arrangement will no doubt be continued for the future.

JAS. L. BRYAN,
Secretary, &c

ALLEGANY COUNTY.

ANDREW GONDER, *President*, GEO. G. McKAY, *Secretary*

OFFICE OF THE SCHOOL BOARD
Of Allegany County, Md.

CUMBERLAND, Nov. 14th, 1873.

HON. M. A. NEWELL,
President State Board School Commissioners, Md:

Dear Sir:—We have the honor to submit the Annual Report of the Free Public Schools of Allegany County for the School year, ending September 30th, 1873.

This Report embraces the statistics of the Schools of Garrett County in addition to those of Allegany. The County tax was levied with a view to the support of the Schools of Allegany County undivided. When the division was consummated, January 1st, last, the Board of Allegany County passed a resolution continuing the Schools within the limits of Garrett County as if no division had taken place, which was carried out in good faith. We were induced thus to act under the belief that Allegany County would receive all school funds arising from State and County regulations for the fiscal year just ended, the latter was received in full, but the former was divided, and a portion given to Garrett County. We have no doubt, however, that the arrangement as understood will be carried out by the Garrett County School Board.

The Financial condition of the School Board is excellent. No bill payable is now outstanding.

By a recent act of the Legislature, a County Treasurer was appointed to disburse the funds according to the levy.

None have felt the great advantage of this arrangement more perceptibly than the School Board: we desire here to express publicly our high appreciation of the gentleman, R. Shriver, Esq., holding that position, for the straightforward, prompt and obliging manner in which he has at all times met the requirements of our Board.

We have built and contracted for more school-houses this year, than any previous year, and will be able to pay all contracted for, within the school year now begun.

The great hindrance to the complete success of the Free Public School system is rapidly disappearing; every populous School District in the County will be supplied with a good and commodious house, before the year now begun is closed.

The schools are making marked progress. The teachers generally, have done their work efficiently, and have given evidence, that the County Institute was not held in vain, and that the money spent by the Board for its encouragement was returned with increase; teachers being imbued with greater love for their calling, and throwing more zeal and system into their work.

Those who merely keep school and hear lessons are gradually disappearing from the profession; but the Teacher who is an Educator in fact, is not only sought after, but highly respected. The people are alive on this subject, and none but good Educators will satisfy them, which is certainly a very excellent symptom, and cannot fail to bring about the time, when the schools of Allegany will be kept open ten months in the year, and good teachers receive such remuneration for their services as will induce them to make teaching their sole profession.

Respectfully submitted,

GEO. G. McKAY,
Secretary.

PROF. M. A. NEWELL,

President State Board of Education:

Dear Sir:—We respectfully submit the annual Report of the Board of School Commissioners of Anne Arundel County, ending September 30, 1873.

During the past year, Mr. Addison Johnson, for years identified with the schools of the county, as an able and efficient officer, resigned his position, and Mr. James S. Robinson equally as able and efficient, was appointed in his place. The present Board, Messrs. Daniel T. Hyde, Dr. N. S. Knighton and James S. Robinson, have been untiring in their efforts to promote the efficiency of the schools. The Statistical Report for the scholastic year, shows an increase both in the number and average attendance of the pupils. Financially, our condition is sound, having during the past year nearly finished paying off the old debts contracted as far back as Mr. Van Bokkelen's administration, and having a sufficient amount in the hands of collectors to pay off all our indebtedness. During the year we have built and furnished three school-houses. In consequence of having lost three school-houses within the last few years by fire, all the school-houses in the county have been insured by the Board in the Mutual Fire Insurance Company of Anne Arundel and Howard Counties. Twelve colored schools are now established with an average attendance of 360 pupils. The sum of one thousand four hundred and eighty four dollars and eleven cents is now due the colored schools, and has been placed to their credit, and will be paid by the School Board, whenever the requisition of their schools demands it.

The County Commissioners with commendable liberty, have levied the amount asked for by the Board of School Commissioners, viz: $15,881, a sum sufficient to pay for building the three school-houses, and meet all other liabilities of the Board.

The anxiety manifested by parents to get their daughters in the Normal School, in order that they may be qualified for teachers, as well as the desire of District Commissioners to obtain graduates of the Normal School, as teachers, conclusively prove the deservedly growing popularity of the Maryland State Normal School, whose efficiency as an educational Institution under your able management, has been productive of incalculable benefit to the Public Schools of Maryland.

Very truly yours,

WM. H. PERVEIL,

Secretary.

BALTIMORE COUNTY.

WM. M. ISAAC, *President.* DR. SAM'L KEPLER, *Secretary*

PROF. M. A. NEWELL,

President State Board of Education:

The Report of the Public Schools of Baltimore County for the year ending September 30th, 1873, is herewith respectfully presented.

As will be seen by the accompanying tables, a large sum of money has been disbursed for building, repairing, and furnishing school houses; and as a complete history of these improvements cannot be obtained from the tables alone. a summary account of them will not be out of place in this statement. In the First Election District, school house No. 2, at Catonsville, has been enlarged by the addition of two rooms, each one 24x18 feet. This house will now accommodate one hundred and fifty pupils. At the Union Factory, in the same district, a stone house 48x 26 feet, having two rooms, has been built on a lot donated to the Board by the Union Manufacturing Company. This house will seat one hundred pupils. In the Third District, two brick houses have been built, each 30x24 feet, known as Nos. 6 and 7. The lot for No. 6 was donated by Mr. Lewis Dehoff, and that for No. 7, by the neighborhood. Each lot contains one-half acre of land. In the Fourth District, a brick house 30x24 feet, known as No. 4, has been built on a lot donated by Mr. Henry Schwartz. In the same district No. 7 at Owings' Mill, has been enlarged by the addition of a room 24x16 feet. In the Fifth District, a stone house 30x24 feet, known as No. 6, has been built on a lot of one-half acre of land, donated by the neighborhood. In the Sixth District, a brick house 30x24, (No. 7,)

has been built on a lot donated by Wm. H. Hoffman. In the Ninth District, schoool house No. 1. Huntingdon Avenue, has been enlarged by an additional room 24x16 feet, and by a vestibule 16x9 feet. It will seat one hundred pupils. In the same district at Towsontown, a two story brick house 50x36 feet, with cellar under it, has been built.

There are two rooms on the first floor, divided by a glass partition, and one room above, which is used as a class room, and also as an assembling room. The necessary cloak rooms have been provided. The lot cost $1000, is 100 feet wide by 180 deep, and is divided into two parts by board fence. A house similar to the above, in almost every respect, has been built at Waverley. The lot which cost $2,500, is 100 feet wide by 100 deep, and is divided as the lot at Towsontown. Both of these houses are well built, present a fine appearance, and have been long needed. In the Tenth District a frame house 24x24 feet, has been built on a lot donated by Messrs Jas. G. Stansbury, David Johnson and Benjamin T. Johnson. The neighborhood assisted in erecting this house, by furnishing materials or labor. This is the only frame house built by the Board during the year. In the Twelfth District, a brick house 40x26 feet, known as No. 3, has been built. All the brick for this house were delivered by the neighborhood without charge. The front of this house is of pressed brick.

All of these houses have a cellar under the vestibule for the safe keeping of fuel, and all of them are furnished with new furniture. They are built of the best materials, and not one of them has cost more than a fair price, which facts are attributable to the careful supervision of the Committee on School Houses, especially of the Chairman of the Committee Wm. M. Isaac Esq., President of the Board, who by his practical knowledge of building, and by his attention to this work, has rendered valuable service to the Board.

In addition to the above, eight more houses are in building, further notice of which belongs to the report of next year.

Many houses have been thoroughly repaired, and in a large number of old desks have been replaced by new ones. The amount expended for building, repairing and furnishing is $34,533,06. This is much greater than any sum heretofore expended in our County, in the same space of time, for similar purposes. There remains yet much to be done, to put all of our school houses in the condition in which they should be.

In last year's report mention was made of the plan of classification of teachers' certificates adopted by the Board; while it is evident that there are only two grades of certificates known to the law, yet the Board felt that it did not exceed its authority in making the salaries of teachers dependent upon their scholastic attainments as determined by examination. This plan was accordingly adopted, with the expectation that teachers would be induced to perfect themselves in the branches of study in which they are required to be examined. There has been no disappointment in the result expected, for our teachers have exhibited a praise-worthy desire to stand in the highest class, not only on account of the pecuniary advantage, but also from a wish to maintain in the eye of the public a good standing as teachers. This they find the more desirable as an annual list is published, in which the grade and class of every teacher are given, from which list Trustees select teachers for their schools. Those teachers, therefore, who stand well in the official list, have that advantage in their favor when applying for positions. Having given this plan of classification a fair trial, our Board is satisfied it acted wisely in establishing it, would it not be well if the law required all certificates to bear upon their face the per centage of questions answered by the holder in every branch of study in which he has been examined? Several advantages which need would not be stated here, result from such a provision of law.

It may not be improper, just here, to say a few words in reference to our teachers; and, disclaiming to speak well

of them undeservedly, it may truly be said, that, as a body, they are efficient, and devoted to their profession While some have improved but little during the past five years, in respect to the majority of them, the reverse of this is true. A number have, by diligent study, gained our highest certificate; while others, who have not been so successful, have taken, at least one step in that direction. That many have increased their usefulness in the school-room, has been evident to the Examiner, in his official visits to the schools, which other duties have caused to be fewer and briefer than he could wish. As a corps, therefore, our teachers are improving, and those who are not doing so are gradually dropping out of the profession. While it is pleasant to record this improvement, it is scarcely necessary to add that there is ample room for still further advancement, and no teacher should think for a moment, that he possesses such a complete knowledge of his profession as to justify him in ceasing to study. Not only is it important to be well grounded in the different studies taught, but it is equally so to be intimately acquainted with the best methods of teaching them. Teachers, therefore, should be eager to make use of every assistance they can obtain in the study of their profession; such as works upon teaching, school journals, &c.; and when any of them find that there is nothing further for them to learn, they would do well to turn their attention to some other occupation.

As was to be anticipated, much doubt and hesitation were felt by our Board, as to the propriety of establishing a class of schools entirely new to the school system of our County. Petitions had been received by the Board, urging the organization of High Schools. It was felt, that these appeals could not be slighted, and that the time had arrived when it became necessary to make some provision for higher education. Accordingly it was resolved to make the trial. Three High Schools are at present in operation, one at Towsontown, one at Waverley, and one at Woodberry, these places being centres of a large population.

An offer was made by the Board, to the trustees of Franklin Academy, at Reisterstown, to enlarge the building and establish therein a High School, provided they would convey the property to the Board. It was understood at one time, that they were willing to make the conveyance, but as yet, no official notification to that effect has been received from them.

It is too early, perhaps to draw conclusions as to the ultimate success, in every respect, of these schools. If the attendance of pupils may be regarded as such an indication, then there is no ground for fear of failure. When the scholastic year closed, June 30th, 1873, there were 69 pupils enrolled in the Towsontown public school. At the present writing, the school now being a High School, the pupils number 195. Waverley High School numbers about the same, and the one at Woodberry will probably be the largest school in the County, when the house is finished.

In establishing these schools, it has not been the purpose of the Board simply to benefit the immediate neighborhood in which they are placed, but to afford the citizens of the county, generally, an opportunity of giving their children a better education than can be obtained in the primary schools. It is not intended to place a High School within walking distance of every citizen's house; but it is proposed so to locate these schools, that all who desire can send their children to them at a very reasonable expense. Heretofore, those wishing greater educational advantages for their children than could be secured in our public schools, were compelled to send to private schools, at a heavy cost, and in many instances beyond the limits of the County. Now while some of our citizens have necessarily less inconvenience in obtaining the benefits to be derived from these schools than others, because they reside near them, yet every one enjoys, or will soon enjoy, facilities for higher education unknown to the people of our county before the establishment of High Schools. These Schools must of course, be comparatively few in number. A primary school

is within two miles of the house of every inhabitant of the County; and if, after the Board shall have organized as many High Schools as are deemed necessary, every citizen finds one within fifteen or twenty miles of his house, the County will posses facillties for higher education unsurpassed by any county in the State. Besides the educational advantages afforded by these schools, it is expected that others will result more or less beneficial to the County. It is a well-known fact that the majority of public school teachers receive their education in the public schools; the knowledge they possess of branches taught, as well as of the art of teaching, they have obtained from the teachers of these schools. In some instances they have had the benefit of good training and discipline, in others they have not been so fortunate. When they become teachers, they seldom fail to adopt, in their teaching, the plans and methods by which they were taught, good or bad. Persons now wishing to qualify themselves for teaching, by attending the High Schools, have better opportunities for becoming fitted for the duties they are to assume, than have heretofore been obtainable. Again, these schools are expected to maintain an advanced position, not only in regard to the branches of study taught therein, but also in regard to governing, discipline, and methods of teaching. Teachers, whose experience has been limited, by visiting these schools, can perhaps learn something which will assist them in the management of their own schools. These High Schools, therefore, if well conducted, cannot well fail of exercising a good effect upon the other schools of the County; and it is needless to refer to other beneficial results that will follow their establishment. The course of study will fit students for admission to the freshman class in College.

Our County School Tax remains unchanged, being fourteen cents in the hundred dollars. This affords a sufficient revenue for the support of our schools, one year with another, and no increase of the levy therefore is re-

quired. The law of 1868 empowered School Boards to determine the amount to be levied for school purposes in the respective counties of the state, and the County Commissioners were required to levy and collect the amount designated. While this law existed, not an instance occurred, it is believed, in which the amount demanded was deemed burdensome by the people. The disposition of School Boards is to ask for as small a levy as possible from the County; and having shown no inclination to be exorbitant in their demands when they had the power to be so if they had wished; and possessing a more thorough knowledge of the amount needed for the support of the schools than those not connected with their management; a liberal policy and a prudent economy would suggest the propriety of providing such an amount of money as the Boards might after due consideration declare to be necessary. The injury done to the schools of a County by an injustifiable reduction of the school tax, is not easily calculated. If an insufficient sum of money is provided for the mending of roads, the roads are not mended—that is all. If the means for keeping the schools in operation are inadequate, the schools are closed—but that is *not* all. The work of years may be thrown away by closing the schools for one term. The teachers trained to familiarity with the working of the schools of the County, become dispersed over the State, or beyond its bounds; school-houses and school apparatus are left unguarded and at the mercy of the evil-disposed; time is lost by many pupils which in all probability, will never be regained; and other injuries are inflicted upon the schools and pupils not for a moment to be compared with the trifling reduction mode in each individual tax-bill. If public schools are desirable, and are to be maintained, let them be provided with the means to conduct them efficiently. Good school houses cannot be built, good teachers cannot be had, nor can books and school apparatus be supplied, if the means is furnished insufficient. It is not the part of wisdom to starve the Public Schools: better

abolish them at once than let them die a lingering death. It is believed that our schools are appreciated by the people of the County, and no complaint is made when a reasonable amount of money is asked for their maintenance. Knowing these facts, it has been the endeavor of the Board, as well as of its predecessors, to make them worthy of the esteem and support of the people.

There has been but one change in our book-list during the year—the substitution of the "New American Readers" for "McGuffeys" series. A large number of black-boards have been furnished the schools during the year, and there is perhaps at present, not a school in the county unsupplied. Several schools have full seats, outline maps, the Board paying one-half the cost of them, and the teachers collecting the balance by contributions from the pupils of the schools. It would be well if they were in all of our schools, but the cost of furnishing them would be great. Perhaps all the schools in the State would be benefited by being as well supplied with school apparatus as they are with text-books.

During the year there have been twenty-two meetings of the Board, and many questions affecting the welfare of the schools have received careful consideration. The building and repairing of so many school-houses have materially added to the labors of the Board. The reports of teachers and other accounts have been thoroughly examined at each quarterly meeting by the Committee on accounts, Messrs Keech and Slade, and when the number of schools, white and colored, is considered, it will be seen, that the labors of this committee have not been light. No important changes have been made in the by-laws, but a number of regulations tending to increase the efficiency of the schools, have been adopted. The Board has been of the opinion that some changes in the present law are desirable; and at one of the recent meetings the following resolution was adopted:

"*Resolved*, As the sense of the Board of County School Commissioners of Baltimore County, that the efficiency of the public schools in this County,

would be much increased if the teachers of the various schools were elected by the School Board instead of being appointed by the trustees of said schools, and we respectfully request the members of the next Legislature of this State from Baltimore County to favor an amendment of the present school law, so as to give the election of teachers to the School Board instead of to the trustees."

Our Teachers' Asssociation has been well attended at each of the four meetings during the year, and the interest taken in its proceedings by the teachers has perceptibly increased. To a very great extent, the members of the Association depend upon themselves to conduct the exercises at the different meetings, and it is seldom that any one not connected with the public schools is requested to take part therein. The Superintendent of the State Normal School has been present at each meeting, and has not failed to bestow a "word in season." At the beginning of the year the Board very properly assists in defraying the expenses of the Association, having appropriated fifteen dollars for each meeting.

The tables show the number of colored schools in operation, the amount expended for their support &c. More money has been spent in maintaining them than has been received from the State. Since the close of the scholastic year, several more colored schools have been established. The Board is desirous of making as ample provision as it can for the education of colored people. Considerable difficulty is at present experienced in obtaining suitable teachers for these schools, but this perhaps will not be of long duration.

SAMUEL KEPLER,
Examiner.

BALTIMORE COUNTY—SUMMARY OF SCHOOL STATISTICS.

For the Year ending September, 1873.

	1873.	1872.

CAROLINE COUNTY.

COL. JAS. E. DOUGLASS, *Pres't.* REV. GEO. F. BEAVEN, *Sec'y*

PROF. M. A. NEWELL,
Principal, State Normal School.

Dear Sir:—The Board is pleased in this its annual report, to be able to say that the condition of the Public Schools under their care and management, has been, on the whole, very encouraging and hopeful. The teachers, in general, have well and faithfully done their work, and seem more to realize under the State provision for Public Education, that teaching has become a permanent profession, that is demanding more and more a definite and thorough preparation as to scholarship, and a lively, passionate interest in the instructor for his work.

The Board has been careful to elevate the standard for examination of applicants for certificates, and in this way has striven to secure more competent teachers.

The people, too, are showing more interest in the cause of Public Education, as is evidenced in their frequent and urgent appeals to the Board for new school-houses, as well in localities where there are none, as in lieu of old and dilapidated ones. Three new school-houses are approaching completion; one of these, a handsome building in the town of Federalsburg, will soon be ready for occupancy and use. Two others will soon be commenced. Let it be said to the praise and credit of the patrons in their respective districts, that in the erection of some of these structures, they more or less generally aid the Board by their contributions.

Nine colored schools have been kept in operation as long as the funds, at the command of the Board would warrant. The inadequacy of means is necessarily

in the way of the efficiency of these schools, for competent teachers cannot be procured to teach for so short a timeon so small a salary. The Board is endeavoring to make the most judicious use of the funds that come into their hands for the maintenance of these schools.

The County Commissioners granted a levy of $7,000, for use in the ensuing year. The Board as usual, has closed the financial year free from debt, with, besides the balance reported in their favor now in Bank, about $800 of last year's levy still in the collectors' hands. There is now on hand about $900 worth of books and stationery.

The Secretary would have it stated to the State Board, that owing to his bad health, and the inclemency of the past winter, he did not make the required number of visits to the schools, and would ask their indulgence.

Respectfully submitted,

JAMES E. DOUGLASS,

President

CARROLL COUNTY.

WILLIAM REESE, *President.* J. M. NEWSON, *Secretary.*

In submitting the Annual Report this year, we have few remarks to make. Nearly all that we would have to say, would be in relation to some better mode of appointing the teachers; a uniformity of text-books for the whole State: a specific *legal* method of placing supplies in the schools; payment for service rendered by the trustees, and kindred subjects, on all of which, (given in former reports,) our views remain unchanged; but we see no useful purpose to be gained by repeating the reason for our convictions.

With the exception of two notes, together amounting to $4,500 given by a former Board to parties who do not wish payment of the principal, the whole heavy indebtedness of about $24,500 existing when the present Board came into office, has been liquidated; but our receipts from all sources are insufficient to enable us to increase our teacher's salaries, which are much to low too attract the best teaching talents to our service.

Until our County Commissioners become more liberal in their assessments for school purposes, or until the law shall be amended so as to *require* them to comply with the demands of the School Board, we do not see how we can be enabled to pay competent teachers adequate salaries, nor how the school-houses still needed can be built.

In May last, when the county taxes were about to be laid, an urgent demand was made for an assessment for school purposes of fifteen cents on the hundred dollars; but the County Commissioners accorded only twelve cents, a

sum quite insufficient to enable the School Board to pay the debts then due, and to increase the teachers' salaries to a fair compensation for efficient service.

By making due allowance for the natural results from a deficiency of funds, the consequent murmurs of worthy teachers, who are not adequately paid on the one hand, and of childless tax-payers on the other, we feel confident that the public schools of Carroll County are in a much better condition, and are much more popular with the whole people of the County than they ever have been.

By comparing the accompanying tables with the report of last year, it will be seen that the number of pupils on the rolls has increased by over 800; and, had it not been for the extensive prevalence of SMALL-POX, and for the unusually severe winter which kept nearly all the younger children from school for several months, the average attendance would have been perhaps 25 per cent. greater.

We had five schools open for Africans, and preparations are being made for two more; but in six of our election districts, it appears they are not "colored" pupils enough to justify the expense of opening schools. Two of those which were opened, attracted so few pupils that the Board has yet taken no measures to re-open them for the ensuing year. Our experience with African schools leaves the impression that "colored" education in the rural districts of Maryland, will have a very limited success, whatever it may promise to be in the cities.

J. M. NEWSON,
Secretary, &c.

CECIL COUNTY.

F. S. EVERIST, *President.* JNO. SQUIER, *Secretary.*

PROF. M. A. NEWELL,
President State Board of Education:

We would report to you that the schools of our County have been kept open during nine months of the past year. As regards their efficient working, they have not declined; on the contrary we think that they have advanced in this respect. Several new School Districts have been created, by the division of old ones, in order more fully to meet the wants of the pupils. Such is now the condition of the various School Districts, that there will be no necessity for much change in the future.

The teachers of the Schools seem to be earnest and diligent in their work; and by means of Teachers' Associations, and a free interchange of views in reference to their work, are qualifying themselves for a more thorough discharge of their duties. We think the Institute held under your supervision, in March of the past year, has had a good influence over the teachers in giving a fresh impulse to their minds, and by giving more enlightened views of their duties and responsibilities.

We have built, during the year, four new school houses, and greatly altered and repaired several others; so that with a few more new houses the whole County will be supplied. It should be stated that all the houses are built in the best manner, after a careful examination of various plans, and in accordance with the wants of the districts in which they are built.

You will see by the Annual Report, that the Colored Schools of the County, are placed upon the same footing with the others in all respects, and are included in the body of the report, and are numbered 1, 2, &c., in their respective districts. They are well conducted: the School Board insisting that the teachers of these schools shall be fully competent for their work.

We have nothing further to report of special interest in regard to the schools, except to say that in some instances the Trusteeship, as now existing in the law, has given some trouble, and is rather awkward in its workings, with reference to the appointment of teachers and the assistants.

Notwithstanding these drawbacks, the present School law is working well, and doing an efficient work in our county, for the education of the young, and qualifying them for the active duties of life.

JNO. SQUIER, *Secretary.*

GEO. M. LLOYD, *Secretary.*

Indebtedness September 30, 1873 ..... $37 60

DORCHESTER COUNTY.

DR. EUGENE HODSON, *President.* DR. JAS. L. BRYAN, *Secretary.*

It is to be regretted that a carefully prepared statistical and financial report should need any explanation, and yet there are two or three points in the accompanying one, about which a few words may not be out of place. By comparing it with the one for 1872, it will be seen that the enrollment of white children is slightly less, and a further comparison of the names of teachers employed in the schools, will show that nearly one-third are new teachers. The two facts should go together, as a change of one-third of the teachers annually, and the introduction of as many new and generally inexperienced ones, will account for the reduced attendance. In fact, the mere reporting of new pupils each term after the first, cannot be learned it seems, by these inexperienced teachers in one scholastic year. Your Examiner inclines to the opinion that the number of pupils enrolled this year is as great as last year, and yet it could not be ascertained from the crude reports submitted. The third difficulty in keeping up the number, arose from the loss to the children of one term's teaching. The average increase each term in a four term year, is nearly one hundred and fifty, and when we teach only three terms, this average increase is not obtained. This number added to the number reported, would have put our enrollment above that of last year. There is much consolation, though, in the fourth fact to be mentioned, that the amount withdrawn from the support of the schools, was applied to the

building of school-houses to take the place of the many wretched ones in use in former years. The same state of affairs must continue for at least one year longer, after which the regular terms will be taught, and possibly larger salaries paid to teachers. It is easy to imagine the result; with good, and in many cases new houses, with a four term arrangement, with better salaries and in consequence better teachers retained, the schools must become better and better, and the attendance be largely increased with a commensurate benefit to the pupils.

In this report, the first formal notice of our colored schools is made. They number nineteen, and were taught by two white and eighteen colored teachers and assistants, and were attended by nearly twelve hundred different children. The schools are generally kept in the churches belonging to the colored people, though there are seven good houses specially used for school purposes. In some neighborhoods, the colored people are making great efforts to obtain suitable houses, and we may hope that with the aid afforded them by persons of all classes, their wishes may be attained.

During the past year, the Pennsylvania School Journal was furnished by the Board to all of the teachers in the county, and the Examiner has no doubt whatever that the expense incurred was largely returned to the community by the benefit derived from this excellent periodical by the teachers. The arrangement will no doubt be continued for the future.

JAS. L. BRYAN,
Secretary, &c

DR. E. HALL RICHARDSON, *President.* ROBERT HENRY, *Secretary.*

PROF. M. A. NEWELL,

Dear Sir:—I submit my report in the hope that it will prove satisfactory. The Board endeavored to keep the schools in operation during the summer term by paying the teachers half the salary, less the book fees, the patrons paying the other half with the exception of six schools, for which, in consequence of lost time, the Board paid the full salary to the teachers.

Our County Commissioners in 1872, gave us 15 cents on the $100 to pay our debt and carry on the schools; in 1873, 13 cents, a diminution of $2,500 on 1872. From this illiberality our debt has been increased at least $3,000. We require 20 cents on the $100 at least to keep the schools in operation three terms, and pay our indebtedness which amounts to $13,000. This debt has been incurred reluctantly by the Board in building, repairing, and furnishing school-houses at the urgent solicitation and on the petition of the patrons and citizens of the different school districts. In many instances, the only alternative was either to build a school-house or suspend the schools. Repairing in many cases would have been a useless expenditure, such has been the dilapidated condition of the school-houses. The Board have furnished the new school-houses with patent desks and the necessary blackboards. The Board have contracted to build two more school-houses in the fourth election district, 42½ feet from outside to outside, 12 feet ceiling, which will cost $2.300. One at Mt. Summit, one at Chrome Hill cost $1,000, and they contemplate building a school-house at Cooptown, all in the fourth

election district. This district in which there are 20 schools requires at least three more new school-houses. The log huts, built thirty or forty years ago, have become so uncomfortable and ill-adapted for school-houses that many patrons refuse to send their children. The Board purchased the lower room of the hall at Jarrettsville, and fitted it up for a school room; the cost will be $950. The Board has likewise purchased the School-House No. 19, fourth election district for $675. We think the people will acquiesce in a tax for building suitable and comfortable school-houses. Harford County has been long enough derelict and far behind modern intelligence with regard to school-houses; it is time she should keep pace with the spirit of the age; she has been a pioneer in the woods with regard to school-houses.

The Board conceive it to be their imperative duty to build commodious and comfortable school-houses, furnished with suitable apparatus as an incentive to patrons to send their children, and to induce pupils to attend, that is, make the school-houses attractive to children. We have cause for congratulation that our teachers are endeavoring to discharge their duties faithfully. We have several graduates from the State Normal School and desire more. Their skill in teaching is manifested by the proficiency of their pupils. It is the duty of our Legislatures to foster the State Normal School, from which we obtain teachers skilled in methods of teaching, and who have adopted teaching as a profession. We have just held our Institute at Havre de Grace, from which you can judge of the character of our teachers, and the interest they manifest in their profession. In conclusion, the Board are animated with a desire to advance the cause of education, to improve the condition of the schools, and promote intelligence and morality in the rising generation.

Respectfully,

ROBERT HENRY,

Secretary.

PROF. M. A. NEWELL,

Dear Sir:—Please find report of the Public Schools of Howard County, for the year ending June 30th, 1873, and for receipts and disbursements of the fiscal year ending September 30th, 1873. Owing to causes beyond human control, the exhibit is far from what I hoped it would be; with an increase of schools, I find the number of pupils enrolled does not exceed that of former years; nor does the average attendance improve. This is in some degree owing to the great scarcity of labor, but I think it especially attributable this year to the prevalence of small-pox in several of our most populous districts. Our teachers' association is in a very prosperous condition; every teacher in the county with a single exception, attends regularly and manifests a laudable interest in all subjects connected with education.

With such material as I could procure I organized six colored schools and was indeed surprised at the progress they made. The attendance was of course very irregular but much better than I expected. In your annual report you made some severe reflections on the disposition made of the High School Fund by our Board of School Commissioners, characterizing it as a backward movement, &c. If you had known the miserable condition of our school-houses, you would have thought otherwise. Some were not even worth repairing, others so far from the centre of

population as to be of little use, and many of them so comfortless that on a cold day you would find teacher and pupils gathered around an antiquated stove striving to keep warm. You know too well the requisites for successful teaching to believe that with such houses a county would be likely to need a High School. Now we are using that fund in building houses with all the modern conveniences and comforts, and are furnishing them likewise.

When all the school-houses in the county are improved and a corresponding interest manifested by its citizens in education, I am sure we shall find no difficulty in building a high school.

We were compelled to use ($1,000,) one thousand dollars of the above fund in 1872, as the County Commissioners levied ($8,000,) eight thousand dollars instead of nine thousand as heretofore. This year they promise to levy ($10,000,) ten thousand dollars so as to replace what we had been obliged to use of said fund, but instead of ten thousand as promised, they levied only ($8,000,) eight thousand, compelling us again to use an additional thousand, forcing us to use it in this way, we shall soon exhaust it.

With sincere regard, very truly yours,

WM. H. HARDEY,

Secretary, &c.

PROF. M. A. NEWELL,

Dear Sir:—Our schools have been kept open the whole year with a pretty good attendance all the time. A few schools have occasionally been for a short time closed from the want of a teacher to suit them. This delay and inconvenience arises often from the too vague and mixed duties of School District Trustees. Their power is something, but just what no one knows; but what power they are supposed to have, they are very jealous to guard and exercise, nor in all cases for the welfare of the schools. The Trustees engage a teacher if they fancy him, or often if he is of the neighborhood, and wishes for a little while to experiment upon school teaching. But nothing is perfect, and upon the whole, the school system seems to work pretty well. We hope that in your deliberations this year, you may find out some few things that need remedying, and suggest them to the Legislature: making it still better for the young people, and giving more satisfaction to the whole people.

The Board have accepted and paid for two houses built this last year, both neat and comfortable, and we think them cheap. They have under contract three new houses now, two of them nearly finished, one at Fairlee, the present terminus of our railroad, a growing town, another to take the place of an old house sold at the Trappe; the third is just near the bay to give accommodations to a

people in a long neck, that heretofore have been isolated, having no house nearer than four miles, and bad walking.

The expenses of the schools have been cut down by the present Board. All debts of the former Board have been cancelled, and this Board have asked for a levy of only $16,000 for 1873, against $20,000 for 1872. There is money enough due the Board from collections and other sources to cancel all of their indebtedness for this year, with the amount asked for from the county. This cutting down of the amount of levy, of course, keeps teachers' salaries at the same low figure, whilst we should like if we could to increase them, and thus stimulate the flagging interest in a few sections by giving all regular trained teachers.

Several lots of land have been paid for, and the titles secured, and the latest patent desks have been placed in five schools. Seven lots have been fenced in, and pumps fixed, and "Old Kent" is now pretty well fitted out with neat and comfortable school-houses, with the necessary conveniences and out-buildings, and pretty generally fenced. We have but few houses now where you can see the old hacked and rough board seat and desk, and soon the last of those eye-sores will have passed into the "things that were but are not."

Respectfully,

CHARLES G. RICAUD,

Secretary.

KENT COUNTY—SUMMARY OF SCHOOL STATISTICS.

For Year ending September 30, 1873.

PRINCE GEORGE COUNTY.

J. H. BLANDFORD, *President.* M. J. STONE, *Secretary.*

PROF. M. A. NEWELL,

Dear Sir:—In submitting my annual report for the year ending September 30th, 1873, I have but few remarks to make in addition to the information contained in the annexed tables. Two of our schools have been unavoidably closed during the past year, causing a slight decrease in the number of pupils in attendance, but not evincing, I think, any decreased interest in school work. One of the school-houses, in consequence of its inconvenient location, has been sold; its place will be supplied during the coming year by a new house and site.

The interest in schools has steadily increased; the County Commissioners have made an additional appropriation of three thousand dollars for building and repairing school-houses, the first appropriation for that purpose which has been made for many years.

The School Board has already entered into arrangements for building two new houses, and a third it is hoped will be commenced early in the spring.

So it will be seen that we are not retrograding in school-work, but on the contrary are sensibly progressing. The appropriation, if continued for a few years, will place all the school-houses in comfortable condition. No portion of the additional appropriation has yet been received by School Commissioners, consequently does not appear in the financial report made at this time.

The present corps of teachers are far in advance of those

of former years, and it is upon them that the success of the whole system in a large measure depends; every care is taken in their selection, and every effort made to enforce discipline among them by strict supervision.

The additional responsibility placed upon the Examiner by the law of last session, by which efficiency in school-work is made a test of the qualification of teachers, will, I think, work well for the schools, but not always pleasantly for the Examiner, for he will frequently have to encounter personal predelictions in favor of inefficient teachers, from a large class who have no knowledge of school matters, and who look more to the wishes and benefit of some neighborhood favorite, than to the permanent advancement of their own children.

In regard to colored schools I can make but a meager report; we have had only nine schools in operation during the year, one conducted in a rented room, eight in houses built heretofore by the Freedmen's Bureau, and used also as churches, over which the School Board could exercise no control or protection.

Under these circumstances the funds have accumulated, and now amount as will be seen by financial report, to $2,963,73, this balance will be expended chiefly in the erection of cheap houses, and we hope will be sufficient together with private contributions to build ten houses, which will answer present purposes.

Local Trustees and Building Committees have been appointed by the Board, and Examiner has endeavored to arouse the interest of the people in the work, but so far his efforts have been attended with little success.

Respectfully submitted,

M. J. STONE,

Secretary.

QUEEN ANNE COUNTY.

HON. R. B. CARMICHAEL, *Pres't.* JAMES W. THOMPSON, *Sec'y.*

PROF. M. A. NEWELL,

President State Board of Education:

Dear Sir:—I send you my annual report, it will give you all necessary information in relation to the condition of the public schools in Queen Anne County, rendering it unnecessary for me to say much in this communication which shall be very brief.

The attendance of scholars you will see has been a little better than it was last year, and I am glad to be able to say that in other respects the improvement is greater than in the increased attendance. It is very gratifying to me to state the following fact: Since my last report, and a short time preceding it, quite a number of young ladies and gentlemen, at least a dozen, educated in the public schools of Queen Anne County within the last four years, have come before our Board, asking for certificates as teachers, and have sustained an examination very creditable to themselves and their instructors, and satisfactory to the Board. They have received certificates, and most of them are employed in our schools. Such facts as these speak well, I think, for our public school system. Before its establishment, such things if heard of at all were very rare. We are able to report as much prosperity and success as in former years at least. We have the means secured to keep our schools in operation as usual during the whole of the current year. Nine of the former pupils of the Normal

School are among us, doing good work and adding to the popularity of the State Institution, established for the purpose of furnishing teachers from our own citizens.

We have not been as successful with the schools for colored children as we desire. Our difficulty lies in our inability to procure teachers for those schools. We made every effort in our power by advertising in the public papers, and by visits to your city to procure them, but with only partial success. We had a few very good teachers who were successful in building up the schools under their charge, but in other instances, we were compelled to employ those who were not qualified for the work, and of course the work was badly done, and I fear there is little prospect of improvement in this respect. We have money unexpended to the credit of the colored school fund, and if we can secure teachers we may report a better state of things next year. If our plans could have been carried out, this money would have been used for their benefit, but as that was not done, it is held sacred for their use, when circumstances will allow of its judicious expenditure. We are as willing to give them schools as they are anxious to receive them. If you can aid us in securing what is so essential to our success, you will secure our thanks.

Very truly yours, &c.,

JAMES W. THOMPSON,

Secretary, &c.

JOHN F. DENT, *President.* J. FRANK FORD, *Secretary*

PROF. M. A. NEWELL,

Sir:—I have the honor to transmit herewith the annual report of the Board of County School Commissioners for St. Mary's County, for the year ending September 30th, 1873, with the hope that it may meet with your approval. Our schools were kept open for only nine months of the year ending July 31st, 1873, it having become necessary to suspend their operation for one month of the winter term, in consequence of our financial embarrassments; and teachers were paid $50.00 for the remaining one-and-a-half months of that term.

By this means the sum of $950,00 was saved from the expenses of the schools for the year just ended, which having been applied to the liquidation of our debts, has relieved us of our pecuniary dfficulties, and placed us in a condition which justifies the indulgence of the belief, that in the future there will be no recurrence of the necessity for a suspension of the schools. You will perceive from the accompanying statistics that the number of schools in operation during the year just ended, is one less than during the year ending September 30th, 1873. This reduction of the number of schools was occasioned by our inability to procure a suitable teacher for one of the schools; arrangements have been made, however, which will enable us to reopen this school for the year just about to begin. There has been a slight diminution in the number of different pupils attending the schools as compared with that of last year, and also a consequent falling off in the pupils in average attendance, this however

does not indicate, as it would at first seem, any retrogression in the working of the school system, but is attributable to two causes; first the reduction of the number of schools, and secondly to the fact that during the winter term the prevalence of small-pox in certain localities rendered it necessary, in some instances, to close the schools for weeks, and in every instance caused a great reduction in the daily attendance of pupils. There have been nine colored schools in operation during the year ending July 31st, 1873, at a cost of $2,080.50, and it is gratifying to report that the working of these schools has been highly satisfactory. The number of different pupils attending these schools was 512, and the pupils in average attendance 128. Their appreciation of the inestimable advantages offered them by a system of free schools, is manifested in this class of our citizens, by the large number of children attending the schools, and the regularity of their attendance.

Many of our school buildings are sadly in need of repairs, some of them indeed so much so as to render them almost entirely unfit for occupation, and in consequence of the limited means at our disposal, we have been enabled to make but slight and temporary repairs.

We made application to the Board of County Commissioners in May last, asking for an appropriation of $1,000.00, for the purpose of making the necessary repairs to these houses, but our application was denied by that body, and unless some relief be rendered us from other source, I apprehend that many of the schools will have to be closed, as they will shortly become entirely untenantable. It gives me great pleasure to bear testimony to the fidelity and zeal with which the Board of School Commissioners have discharged their duty, under circumstances oftentimes very trying; and I congratulate my county upon its possession of a Board composed of gentlemen so eminently qualified for the important position they occupy.

I am very respectfully yours,

J. FRANK FORD, *Examiner.*

Board County School Commissioners.

PROF. M. A. NEWELL,

President State Board of Education:

Sir:—In transmitting the second annual report of the Board of School Commissioners of this county, it is a source of profound satisfaction, that invincible facts demonstrate that the cause of popular education is steadily advancing. A careful inspection of the statistics of this report, will show not only that the schools have increased in number and risen in character, but that they have grown in the confidence and interest of the public. Notwithstanding several of the industrial pursuits of this county militate very much against the success of our schools, yet the increased number of pupils, and the still larger increase of average attendance most clearly show that this system of public instruction is more generally supported, and more and more thoroughly appreciated. At the same time the universal patronage of the schools, the enlarged and more elevated course of instruction, and the spirit of earnest co-operation, manifested by the most enlightened portions of this community, are permitting this Board to see that the object of their highest ambition, to wit: that this system of public education is becoming more worthy of the fostering care of an intelligent and elevated population—is being realized. During the past year much has been done in repairing and improving the houses already built, and in multiplying the facilities for a more efficient and thorough course of instruction. Since our last report two high

schools and one grammar school have gone into successful operation, and another large building has been completed which will soon be opened as a grammar school. Two more houses for primary schools are now in process of erection. But notwithstanding all this has been done, a vast deal more is to be accomplished before this system will reach its highest point of efficiency and success. It grieves us to state that in some localities where this Board has struggled hard to secure them the opportunity of a more extensive and thorough education, its efforts have not been reciprocated by an efficient co-operation on the part of the people. But in some other parts of the county, we are happy to state that the efforts of the Board have been sustained by a generous and noble enthusiasm. There is another item which should have a place in this report, and that is that this county has four students upon public funds in college, (three in St. John's, one in Washington College, Chestertown,) three of whom are entirely supported with the exception of clothing by State appropriations, and the other has his tuition from the public funds; and it is exceedingly gratifying to know from the reports of their teachers, that the scholarship and reputation of the county for gentlemanly deportment are not suffering at their hands. The financial condition of the Board is still prosperous. Although its revenues have fallen off very considerably, yet it has so managed its operations as to secure funds sufficient to keep the schools in operation, four terms in the year. The teachers, though not so liberally compensated as they should be, are punctually paid at the close of every session. The same system in relation to school books that was in operation last, continues this year.

The colored schools are rapidly increasing in efficiency. The Board has established these just as fast as they could find competent teachers to take charge of them. To do this is a work of no little difficulty. Several houses are now in process of erection for the use of this class of our population, and in relation to this portion of our citizens,

we can only repeat what was said in our last report, that the Board are promptly using all the means in their power to accomplish the objects contemplated by the Legislature in its appropriation in their behalf.

It is a pleasant duty to bear our unqualified testimony to the competency, skill and fidelity, of most of our teachers. There are some of them that deserve from us especial commendation, and were it not invidious to the rest we should gladly place their names on public record. This may not be the time or place to speak of those improvements that are essential to make this great work of public instruction most useful and successful, but we cannot close this report without expressing the hope that the wisdom of the coming Legislature may be employed in perfecting a system with the successful operation of which the future prosperity and glory of our beloved State are most intimately involved.

For the Board,

Very respectfully yours, &c.,

A. C. HEATON, *Secretary.*

The policy of this Board in relation to the colored schools has been in all cases to employ thoroughly competent teachers, and them only; and to patronize these schools when such teachers could be obtained. The result of this course is that quite a balance to their credit remains in this treasury. This balance is reserved for building new houses and furnishing those already built.

WILLIAM STEWART, *President.*

TALBOT COUNTY.

HENRY P. HOPKINS, *President.* A. CHAPLAIN *Secretary.*

PROF. M. A. NEWELL,

President State Board of Education:

Sir: I have the honor to transmit herewith, to the State Board of Education, the statistical report of the Board of County School Commissioners of Talbot county, for the scholastic year ending July 15th, 1873, and the fiscal year ending September 30th, 1873.

The success of our schools has been highly gratifying, but their progress, in many instances, has been impaired during the year by the irregular attendance of pupils. This may be accounted for, however, in part, by the present condition of labor. Many of our farmers have been compelled to either entirely withdraw some of their children from school, or to keep them at home a portion of the year to assist in farm labor.

Our Board desires to extend their thanks to Miss Richmond, one of your assistants in the State Normal School, for her valuable services at our institute held at the beginning of the school year. The institute was attended by an earnest and attentive class of teachers, who said that they should go to their schools with renewed energy, and believing that they should be able to do far better teaching from the hints and instructions they had received. A constant improvement has been observed in the manner of our teachers in the school room, and in the method and thoroughness of their instruction. Indeed, we regard the professional merits of our teachers considerably in advance of the remuneration they receive for their labors.

For the Board,

A. CHAPLAIN,

Secretary.

WILLIAM RAGAN, M. D. *President.* P. A WITMER, *Secretary.*

PROF. M. A. NEWELL,

Dear Sir:—We present herewith the annual statistical report of the public schools of Washington County, for the year ending September 30th, 1873. The statistics will show that we are making gradual improvement in matters pertaining to public education. It is gratifying to know that our average attendance is constantly increasing, and a greater number of pupils is yearly taught the different branches embraced in our schedule of studies. The Board is steadily pursuing the policy inaugurated six years ago of supplying comfortable and substantial houses, though its operations in this direction have, for the last two years, been limited because of insufficient levies for that purpose.

We report for the present year four new houses including one for a colored school, at an average cost for building and furniture of $780.48. In addition to the four reported eight others have been contracted for, and commenced since the 1st of last August, four of which are now completed and occupied; whilst the remaining four will be ready for occupation by the 1st of December next.

The hopes which I indulged in my last report, with regard to the prompt payment of teachers during the year just ended, have not been fully realized, and although teachers were promptly paid for fall and winter terms, I regret to say that the expiration of the spring term found us with funds barely sufficient to defray half the expenses of that term. I report to you arrearages of county taxes amounting to $9,600.00. It cannot, therefore, be expected that our school authorities shall promptly meet the demands upon them when payment of taxes is deferred, and the provisions

of law in this respect constantly and utterly disregarded. I would suggest as the most feasible remedy for this evil, the propriety of such legislation as shall compel the fiscal agents of the several counties of the State, to collect and pay over the county school tax at such times, and in such sums as may be required by the several School Boards, under proper limitations and regulations. I deem it proper to advise you of the diversion of the academic fund of this county from the Treasury of the School Board.

The Legislation of 1811, by resolution, donated annually and perpetually to the Hagerstown Academies, the sum of eight hundred dollars. The act of 18— directed that all educational funds paid to Washington County, should be paid to the County School Board. Acting upon the plain intent of the law, the Comptroller of the Treasury has since that time (18—,) been paying the academic fund into the School Treasury of the county. Some time during the past summer, suit was instituted in the Circuit Court for Anne Arundel County, at the instance of the Trustees of Hagerstown Academy to compel the Comptroller by mandamus to pay over the academic fund to said Trustees. This suit has been determined in favor of the academy, and henceforth the fund will be lost to the public schools, at least until such time as a repeal of the original resolution can be brought about.

I cannot close this report without alluding to the annual meeting of the State Teachers' Association, held in Hagerstown in the month of August last, and am gratified to know that the meeting was successful, not only in point of numbers and the high character of the papers presented, and of the discussion of important educational tropics, but also in its results to our people by exciting a deeper interest in educational matters, and a higher appreciation of the profession so fully and so worthily represented on that occasion.

Respectfully submitted,

P. A. WITMER.

Secretary.

PROF. M. A. NEWELL,

President State Board of Education:

Dear Sir:—I herewith submit to the State Board of Education, the annual report of the Board of School Commissioners for Wicomico County, for the fiscal year ending September 30th, 1873, and for the scholastic year included within the same period.

As will be seen from the report the schools were not in operation the entire scholastic year, having been closed a part of both the fall and summer terms. The suspension during the latter term from the 15th of May, the close of the spring term, until the 23d of July, the middle of the summer term, was made to allow the parents the services of their children through a very busy portion of the crop season, but it caused a break in the continuity of school work, the repetition of which experience has shown is not at all desirable. While at home and in the fields, the pupils became so weaned from their books and their studies, that but few of them returned to school, and these seemed to have lost both their ability and their disposition to study. The Board has resolved that hereafter, the schools shall be run continuously from the opening until they are finally closed for the year.

The greater portion of our population is engaged in agricultural pursuits, and in the general scarcity and high price of farm laborers, farmers will keep their children at

home in the crop season. Expatiate to them as sublimely and forcibly as you may upon the benefits of education; use whatever arguments you can command to enforce the importance of sending their children regularly to school, still you cannot convince them that the mental wants of their children are paramount to their physical, or that intellectual training is of more vital concern than food and raiment. They will rebuke you with the declaration that they are poor, that their little ones and themselves must have bread, and that in pursuit thereof, the assistance of their children is of material importance. In and around Salisbury, the strawberry fields have become unusually numerous, and without the aid of the children in picking the berries, the crop could not be saved. Hence the terms have been so arranged that the spring term will close about the beginning of the picking season, and the schools can be stopped with the avoidance of fractional terms.

Seven new school-houses already built or in the course of erection, with the repairing of others, costing altogether about $3,300, are to be paid for out of the levy of $6000, for the current year, after which there will be no heavy drain upon the school funds for building purposes for some time to come.

In the last report from this Board, you were apprised of the fact that a county high school had been organized. This school is still in operation with an increased number of pupils, and with flattering prospects of success. By allowing no new class to enter at the beginning of the present year below those started at first, we have been able to raise the standard of admission higher than it was expedient to fix it at the organization of the school. In the course of the last year, an effort has been made to grade the schools in Salisbury below the high school, the divisions being a grammar school and three primaries. The lines between these schools have not been definitely and distinctly drawn, as we found that before this could be done some experience was needed, but as soon as practicable this will be done.

As you will discover from the financial report, more money was received during the last fiscal year on account of colored schools than was expended. This was occasioned by the want of competent teachers to take charge of this class of schools, and some of those now in operation are from the force of necessity taught by men and women having no educational qualifications to recommend them. The great need of our schools is teachers trained for the legitimate work of the school-room, and these I am convinced we cannot have until we can pay them better salaries and give them constant employment.

For the Board,

GEO. W. M. COOPER,

Secretary.

WM. J. AYDELOTT, *President.* GEO. W. COVINGTON, *Secretary.*

PROF. M. A. NEWELL,

President State Board of Education:

Dear Sir:—I have the honor to submit my report of the public schools of Worcester County for the year ending September 30th, 1873. The number of pupils, the average attendance, and the number studying the various branches, differ but little from the report of last year, but that difference, I am pleased to say, is slightly in favor of the present year. The irregular attendance is entirely attributable, in our opinion, to the scarcity of labor in our midst, whereby parents engaged in agricultural pursuits are compelled by necessity to keep their children at home during the busy season. The cause is easily pointed out, but it is a difficult problem as to what shall be the remedy. Our schools have been kept open, with few exceptions, during the entire four terms.

Three new school-houses have been built during the year, two of them according to the usual plans and specifications adopted by this Board, the other on a much larger scale. The latter is located in Whaleyville, and will be used for the purposes of a grammar school. This building was erected under the personal supervision of three of their citizens, who served as a building committee, without pay, under appointment by the Board, and, whilst in the discharge of their duty, have evinced both taste and judg-

ment in the construction of their neat school edifice, and at the same time have not been unmindful of the interest of the county in the matter of economy.

A number of colored schools have been organized under the care of this Board during the year; the colored churches, for the most part, being used as school-houses. The difficulty of obtaining competent colored teachers for their schools, anticipated by me and referred to in my last report, has been fully experienced by our Board. Considerable pains were taken to procure teachers by advertiseing in the papers, and otherwise, and with little success, as only two presented themselves who could hold second grade certificates. Rather than that these schools should remain closed for their want, while the money for their education was lying idle in the treasury, our Board determined inasmuch as it was under the law, to organize at least one such school in each election district, to issue temporary permits to teach, to waiting applicants who were not suficiently advanced to obtain the required certificate. By this means we have been able to organize and operate seven colored schools during a part of the year, and in the next year the number will be increased.

The plan of furnishing school books adopted by a former Board, and alluded to by the present one, has been to appoint an agent from among the mercantile community in each of the three largest towns—Berlin, Snow Hill and New Haven. These agents buy and sell under the direct supervision of this Board, and are allowed to make but a small profit on the cost. This plan has been found to work well, since it is a great convenience to the pupils, and the Board is at the same time relieved of the trouble and much expense in its book account.

Our financial condition continues satisfactory. Our teachers have been paid with as much promptness as could have been expected, considering the scarcity of money in our agricultural community, and the consequent difficulty experienced by collectors in collecting taxes. Though the accompanying financial statement shows a considerable

indebtedness to the treasury, this was immediately liquidated by the receipt of the October apportionment of the State tax, which, of course, as the year ended September 30th, is not embraced in this statement.

The amount asked for and levied upon the county for school purposes this year was $5000, it being $1000 less than last year. The Board felt justified in reducing their demand to this extent, from the fact that we have paid off all or nearly all the old indebtedness of former Boards, as well as that incurred by the present one, and it was estimated that this sum together with our other assets, would be sufficient to meet the usual drafts upon the treasury during the year, both for current expenses and building school-houses.

Respectfully submitted,

GEO. W. COVINGTON,

Examiner.
